6. OWNER SIGNATURE: \_\_\_\_\_

A reduction in meter size is subject to a favorable engineering feasibility and water needs analysis performed by the District and payment of applicable fees. When downsizing a service, the District will install and connect all devices and appurtenances on the District side of the meter. The customer shall contract with an appropriate vendor to connect the new meter to the existing water service on the customer side of the meter.

No adjustment of the Capital Cost Recovery Fees will be considered for meter downsizing. Any subsequent replacement with the original or larger meter service will be subjected to the then prevailing Capital Cost Recovery fee schedule and regulations.
