1 unit = 100 cubic feet (HCF) or 748 gallons

¹ Base = Connections not in Pressure Zone I or Pressure Zone II
Pressure Zone I = Connections served by Gobernador Reservoir
Pressure Zone II = Connections served by Shepard Mesa Tank

² BASE = 5 year Dec. to Mar. water consumption by account / dwelling unit; 6 HCF minimum

³ PEAK = all consumption in excess of BASE

⁴ Agricultural customers with residential units pay a Residential Equivalency fee that covers drinking water treatment related costs.

⁵ Monthly Service Charges for individually metered dwelling units or structures include 1) a basic component to fund costs associated with meter maintenance, customer service, and billing and 2) a State Water Project or SWP component to fund 100% of the District's SWP debt obligation. This charge varies with meter size.

Monthly Service Charges for residential units served by a master meter are adjusted to the service level of a ¾" meter for the SWP component of the charge. The SWP/DEQ charge appears only on the bills of master metered accounts. It equalizes the SWP charge for all dwelling units served by master meters. The DEQ charge is not shown in a table (like Tables I-V) because the charge is a formula based on meter size and the number of dwelling units on the account.

⁶ The Capital Improvement Program or CIP charge pays the District's non-SWP debt obligations and capital project costs associated with projects helping the District meet current and proposed drinking water quality standards set by the United States Environmental Protection Agency and enforced by the California State Water Board. These charges are based on 5-year average monthly water use, subject to a minimum of 6 HCF and a maximum of 125 HCF per month.

⁷ The AG O&M charge appears only on the bills of agricultural accounts. This charge funds the portion of costs that are collected from other customer classes through the CIP charge, which recovers costs associated with the District's non-SWP debt obligations and capital project costs associated with projects helping the District meet current and proposed drinking water quality standards. These charges are based on meter size.

⁸ Monthly Service Charges for Fire Service include the Basic and SWP components to recover costs associated with providing private fire protection. These charges are based on meter size.
