XI. ADJOURNMENT.

Robert McDonald, Secretary

Note: The above Agenda was posted at Carpinteria Valley Water District Administrative Office in view of the public no later than 5:30 p.m., July 10, 2022. The Americans with Disabilities Act provides that no qualified individual with a disability shall be excluded from participation in, or denied benefits of, the District's programs, services, or activities because of any disability. If you need special assistance to participate in this meeting, please contact the District Office at (805) 684-2816. Notification at least twenty-four (24) hours prior to the meeting will enable the District to make appropriate arrangements. Materials related to an item on this Agenda submitted to the Board of Directors after distribution of the agenda packet are available for public inspection in the Carpinteria Valley Water district offices located at 1301 Santa Ynez Avenue, Carpinteria during normal business hours, from 8 am to 5 pm.

1301 Santa Ynez Avenue Carpinteria, CA 93013 (805) 684-2816

**Indicates attachment of document to agenda packet.

RESOLUTION NO. 1120

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE CARPINTERIA VALLEY WATER DISTRICT PROCLAIMING A LOCAL EMERGENCY PERSISTS, RE-RATIFYING THE PROCLAMATION OF A STATE OF EMERGENCY BY GOVERNOR NEWSOM'S ORDER DATED MARCH 4, 2020, AND RE-AUTHORIZING REMOTE TELECONFERENCE MEETINGS OF THE LEGISLATIVE BODIES OF CARPINTERIA VALLEY WATER DISTRICT FOR THE PERIOD JULY 13, 2022 TO AUGUST 13, 2022 PURSUANT TO BROWN ACT PROVISIONS.

WHEREAS, the Carpinteria Valley Water District is committed to preserving and nurturing public access and participation in meetings of the Board of Directors; and

WHEREAS, all meetings, with the exception of statutorily authorized closed meetings, of Carpinteria Valley Water District's legislative bodies are open and public, as required by the Ralph M. Brown Act (Cal. Gov. Code 54950 – 54963), so that any member of the public may attend, participate, and watch the District's legislative bodies conduct their business; and

WHEREAS, the Brown Act, Government Code section 54953(e), makes provision for remote teleconferencing participation in meetings by members of a legislative body, without compliance with the requirements of Government Code section 54953(b)(3), subject to the existence of certain conditions; and

WHEREAS, a required condition is that a state of emergency be declared by the Governor pursuant to Government Code section 8625, proclaiming the existence of conditions of disaster or of extreme peril to the safety of persons and property within the state caused by conditions as described in Government Code section 8558; and

WHEREAS, a proclamation is made when there is an actual incident, threat of disaster, or extreme peril to the safety of persons and property within the jurisdictions that are within the District's boundaries, caused by natural, technological or human-caused disasters; and

WHEREAS, it is further required that state or local officials have imposed or recommended measures to promote social distancing, or, the legislative body meeting in person would present imminent risks to the health and safety of attendees; and

WHEREAS, the Board of Directors previously adopted a Resolution, Number 1119 on June 29, 2022, finding that the requisite conditions exist for the legislative bodies of Carpinteria Valley Water District to conduct remote teleconference meetings without compliance with paragraph (3) of subdivision (b) of section 54953; and

WHEREAS, as a condition of extending the use of the provisions found in section 54953(e), the Board of Directors must reconsider the circumstances of the state of emergency that exists in the District, and the Board of Directors has done so; and

WHEREAS, on March 4, 2020, Governor Gavin Newsom proclaimed a State of Emergency to exist in California due to the threat of COVID-19; despite sustained efforts, the virus, and its variants, continues to spread and has impacted nearly all sectors of California; and

WHEREAS, the Carpinteria Valley Water District Board of Directors does hereby find that the rise in SARS-CoV-2 Omicron Variant has caused, and will continue to cause, conditions of peril to the safety of persons within Carpinteria Valley Water District's jurisdictional boundaries that are likely to be beyond the control of services, personnel, equipment, and facilities of Carpinteria Valley Water District, and acknowledges and ratifies the proclamation of a state of emergency by the Governor of the State of California and the Santa Barbara County Health Officer's Recommendation for AB 361 for social distancing issued Sept 28, 2021; and

WHEREAS, as a consequence of the local emergency, the Carpinteria Valley Water District Board of Directors does hereby find that meeting in person could pose imminent risks to the health or safety of attendees; and

WHEREAS, the Carpinteria Valley Water District Board of Directors does hereby find that Carpinteria Valley Water District shall continue to conduct its meetings without compliance with paragraph (3) of subdivision (b) of Government Code section 54953, as authorized by subdivision (e) of section 54953, and that such legislative bodies shall comply with the requirements to provide the public with access to meetings as prescribed in paragraph (2) of subdivision (e) of section 54953; and

WHEREAS, all meeting agendas, meeting dates, times and manner in which the public may participate in the public meetings of Carpinteria Valley Water District and offer public comment by telephone or internet-based services options, including video conference, are posted on the Carpinteria Valley Water District website and physically within Carpinteria Valley Water District's jurisdictional boundaries.

WHEREAS, on March 25, 2020 the Board was presented with the COVID19 Operational Continuity and Social Distancing Plan.

NOW, THEREFORE, THE BOARD OF DIRECTORS OF CARPINTERIA VALLEY WATER DISTRICT DOES HEREBY RESOLVE AS FOLLOWS:

- 1. <u>Recitals</u>. The Recitals set forth above are true and correct and are incorporated into this Resolution by this reference
- Proclamation of Local Emergency. The Board hereby proclaims that a local emergency now exists throughout the District, and COVID-19 has caused, and will continue to cause, conditions of peril to the safety of persons within the District that are likely to be beyond the control of services, personnel, equipment, and facilities of the District.
- 3. <u>Risks to Health and Safety of Attendees</u>. The Board of Directors hereby determines that meeting in person could present imminent risks to the health and safety of attendees.
- 4. <u>Ratification of Governor's Proclamation of a State of Emergency</u>. The Board of Directors hereby acknowledges and ratifies the Governor of the State of California's Proclamation of State of Emergency, effective as of its issuance date of March 4, 2020.
- 5. <u>Remote Teleconference Meetings</u>. Carpinteria Valley Water District staff are hereby authorized and directed to take all actions necessary to carry out the intent and

purpose of this Resolution including, conducting open and public meetings in accordance with Government Code section 54953(e) and other applicable provisions of the Brown Act.

 <u>Effective Date of Resolution</u>. This Resolution shall take effect on July 13, 2022 and shall be effective until the earlier of (i) August 13, 2022, or such time the Board of Directors adopts a subsequent resolution in accordance with Government Code section 54953(e)(3) to extend the time during which the legislative bodies of Carpinteria Valley Water District may continue to teleconference without compliance with paragraph (3) of subdivision (b) of section 54953.

PASSED AND ADOPTED by the Board of Directors of Carpinteria Valley Water District, this 13th day of July 2022 by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

Case Van Wingerden, President

Robert McDonald, Board Secretary

STAFF REPORT VII. A.

Prepared By: Maso Motlow, Management Analyst

For Consideration:

Item VII. A. Review proposed methods for determining initial water allocations

Background

This District is developing an allocation program that will provide each account or parcel within the District guidance on their expected water use in times of drought. These allocations will also help the District understand total system demand, and plan for future changes in demand. The first step in developing this program is to determine specific methods for calculating the water allocation assigned to each parcel or account. District staff are seeking input from the Strategic Water Management Committee and Board of Directors to ensure the proposed methods are appropriate and equitable.

Methods

Initial allocations

Each account or parcel within the District receives a monthly allocation in hundred cubic feet (HCF). These represent total monthly indoor and outdoor water use regardless of whether that water use is currently supplied by a well, or District metered water. Further, these allocations represent the expected use based on the account or parcel's characteristics. This ensures allocations do not underrepresent potential use.

These allocations are primarily driven by account classification, parcel characteristics, and data availability. The size of the parcel, type of use, and number of dwelling units will influence the allocation. For example, a residential parcel with one dwelling unit will have a different allocation than a master meter residential parcel with many dwelling units. Additionally, the formula for calculating residential allocations is different than the formula for calculating commercial, industrial & institutional (CII) allocations.

Missing data

Because allocations are based on factors like irrigable area and land use type, data may be unavailable for an individual account. In these cases, the program uses averages, or historical use to determine the allocation. The method for addressing missing data varies with account classification.

Complications that require assumptions

The initial allocation method does not work perfectly for each account due to limitations in the data. For example, if there are multiple accounts on one parcel, the total area of a parcel may be known, but the portion of the parcel associated with individual accounts may not be available. As a result, the District must make assumptions about the area associated with each account.

Deliverable

For initial review and discussion, District staff are documenting the allocation method in a PowerPoint. After gathering feedback from the Committee, Board, and public, District staff will document the final methodology in a policy document (Word document). An Excel spreadsheet will calculate the allocation for each individual parcel or account. Information about the program and opportunities for public involvement will be available on the District's website.

Schedule

- July, September, October, November, December District meetings internally with staff, with the Strategic Water Management Committee and with the Board of Directors to refine and improve the method, results, and policies.
- August, September, October, November Public workshops on the proposed method, results, and policies. *The District will provide two weeks' notice for each workshop, make workshop information publicly available online, and post responses to workshop comments online.*

Recommendation

N/A – This is an informational item that does not require a recommendation.

GENERAL MANAGER

Robert McDonald, P.E. MPA

To: Bob McDonald, General Manager From: Brian King, District Engineer Date: July 6th, 2022

For Consideration: Siemens Project Completion

Background

The District entered into an agreement for energy and meter reading efficiencies program with Siemens Company. The Idea was that after implemented the District would realize savings through efficiencies and energy production that would offset the cost of the improvements. Additionally, there were intangible benefits that would be gained by implementing the improvements such as; solar energy production options, better visibility into water use that could be used for conservation planning, knowledge with respect to the meters and their condition, eliminating or greatly reducing the need to reading meters onsite, providing customers with the ability to track their water use from an online portal and detecting leaks quickly.

The implementation of the project can be broken into five phases. Originally the project was to be implemented in four phases however the installation of endpoints became an issue because the original vendor for endpoints was unable to deliver contracted performance levels with their technology and therefore those endpoints had to be removed and replaced with another technology. This caused one additional phases, removal and replacement of endpoint was the last phase to be completed. Below is a timeline of the project in phases.

- 1. First phase was replacing the lighting within the District office building with high efficient lights. This part of the program was completed 2017 within 2 months of the execution of contract.
- 2. The second phase of the project was the replacement of all water meter 2 inch and smaller with Badger stainless steel E-series meters. The 3 inch and larger meters had already been replaced with new Sensus meters by the District staff. This included installation of "radio" endpoints that ultimately failed to perform. The installation of meters and radio endpoints was completed in 2019.
- 3. This phase of the project was the replacement of endpoints on all the meter for a complete AMI metering system. This was completed June 2022.
- 4. This Phase of the project was the installation of the Solar Arrays in the District parking lot. This was completed in 2019
- 5. This phase of the project was to analyze the placement of solar arrays on the Carpinteria Reservoir. This phase was not completed.

After delays resulting from a number of events such as Thomas Fire, flooding, Pandemic and supply chain issues the project is substantially complete. No additional charges for the District were added to the contract from theses events. A number negotiated concessions did result from the changes that occurred during the implementation of the project: a summary of those changes are below.

- 1. Badger endpoints were used to replace the Itron endpoint. The Badger endpoints use cellular technology as opposed to Itron which uses its own proprietary radio network. This means the need to locate and install network antennas throughout the District service area was removed from the project. Staff believes that this cut the overall project complexity and cost by a significant amount.
- 2. The District took on the cost of the annual cellular charges in lieu of the radio licensing charge, a roughly equal swap in dollars. In addition to this, the District was able to include under the contract a customer portal piece that is included in Badgers system, that was not part of the original contract at no additional cost.
- 3. The Solar analysis for Carp Reservoir was not completed due to the fact that details of the bolted connections on the reservoir roof were not available for the structural engineer to analyze. A preliminary report was issued and can be used to complete the work if the District chooses to. Because the work was not completed Siemens agreed to refund the cost of that work in the amount of \$15,438.
- 4. The annual performance verification technically could not be started until I the contract was completed. The verification was to be annually for 15 years. The Lease payments started on 2018 and will be completed in 15 years from then, or 2033. The Performance guarantee will extend 15 years from 2022, or 2037. This is a result of the delays.

Analysis

The Largest component of the Project was the meter replacement and AMI system. This was also the most complex part of the project. The outcome is excellent though, as we now have in place a robust real time leak alert, an on-demand meter reading system, a reduction apparent water loss from 10% to 4%, or a savings of ~250 AFY resulting from better meter accuracy, and customers can manage their water use through a water user portal. The Solar array has been completed and produced 900,000 kWh since commissioning that's equal to 1300 AF of groundwater pumped on solar power. Finally, the replacement of the bulbs with LED bulbs has shown no negative issues for the lighting in District buildings but has certainly reduced the overall power consumption.

Recommendation:

Staff recommends that the General manager be authorized to issue a notice of completion and do everything necessary to close out the implementation of the project.

SCOPE OF SERVICES: CAPP PROGRAM MANAGEMENT AND CONSTRUCTION MANAGEMENT

INTRODUCTION

The Carpinteria Valley Water District (CVWD) is implementing the Carpinteria Advanced Purification Project (CAPP) to increase local, drought-resistant water supplies and reduce dependence on imported, drought-impacted surface water supplies. CVWD is partnered with the Carpinteria Sanitary District (CSD) to implement the CAPP. To date, a preliminary design report is complete and the CAPP EIR was certified in 2019. In addition, 50% design plans were prepared for CWSRF loan application. The focus of the next phase of efforts include final design, permitting, and funding; following by construction and startup, as presented in the following table.

Phase	Duration	Assumed Schedule	Associated Tasks
Project Planning		Feb 2014 – Jul 2022	Complete
Final Design and Permitting	18 months	Aug 2022 – Jan 2024	Tasks 1 to 6
Construction, Startup, and Close-Out	18 months	Feb 2024 – Oct 2025	Task 7

In addition to common construction permits and approvals, CAPP must receive a discharge/reuse permit from the Regional Water Quality Control Board (RWQCB) that requires antidegradation analysis, geochemical analysis, and State Water Resources Control Board (SWRCB) Division of Drinking Water (DDW) approval of a Title 22 project Engineering Report. Also, CSD will need to modify their existing National Pollutant Discharge Elimination System (NPDES) permit for discharge of treated wastewater effluent to the ocean. Efforts under this contract include leading permit acquisition and preparing materials for non-construction related permits (which will be handled by the Design Engineer).

Several funding opportunities have been and are being pursued. A SWRCB Clean Water State Revolving Fund (CWSRF) loan agreement is expected to be completed in 2022 and CVWD submitted a grant application to the United States Bureau of Reclamation (USBR) on March 15, 2022 that could fund up to 25% of eligible capital costs. CVWD's goal is to receive an addition 25% funding from State or other non-Federal funding. Efforts under this contract include identifying and pursuing this funding.

This scope and fee estimate is for Program and Construction Management services through startup and close-out and include program management, design oversight, funding support, permitting support, construction management, and startup support. The Design Engineer(s) will contract with CVWD directly to prepare the Final Design and perform Engineering Services During Construction for the three project components: 1) Advanced Water Purification Facility; 2) Pipelines; and 3) Wells. As program manager, WSC would oversee the Design Engineer(s)' efforts along with other consultants contracted by CVWD for CAPP, such as Pueblo Water Resources for groundwater and well work and Katz and Associates for public engagement.

Note that the "**CAPP Team**" term used in this scope includes CVWD, CSD, WSC, and other consultants supporting CAPP.

Scope of Services: CAPP Program Management and Construction Management

The work under this contract is expected to commence in August 2022 and is divided into two phase: 1) the Final Design phase (Tasks 1 to 6) is expected to take 18 months and continue through January 2024; 2) the Construction phase (Task 7) is expected to take 18 months, starting in February 2024 and continue through October 2025.

Work under this contract will be performed on a Time and Materials Basis. Given the preliminary characterization of CAPP, it is anticipated that the tasks will evolve to accommodate changing CAPP needs. Therefore, the budget allocations provided for each task are estimates only and CVWD will have the flexibility to reallocate budgets between tasks, as dictated by CAPP needs and as directed by CVWD. In the task descriptions below, assumptions are provided to clarify the included scope and budget. To the extent that revised assumptions and/or scope necessitate additional budget, WSC will work with CVWD in good faith to negotiate a contract change or amendment as appropriate.

In addition, due to the duration of the work in this scope – over three years – initiation of work under each task will require approval from the CVWD General Manager.

TASK 1.0 CAPP ADMINISTRATION AND COORDINATION

1.1 Program Administration

- Provide oversight of resources, manage communication, and coordinate work efforts of the Project Team to align with CAPP priorities and to deliver the final design phase scope.
- > Plan, organize, and conduct regular internal CAPP Team meetings to facilitate delivery of scope.
- Coordinate with Project Team consultants, as needed.
- Prepare monthly invoices and monthly progress reports.
- Assumption: Budget is based upon an assumed level of effort for this task of 24 hours per month for 18 months.

1.2 Implementation Plan

- Develop an Implementation Plan for construction of CAPP infrastructure, including simple evaluation of delivery methods (e.g., design-bid-build, design-build, etc.), scope of bid packages, and equipment pre-purchase/pre-selection.
- > Evaluation will include regulatory, cost, schedule, and risk considerations.
- > Prepare a draft Implementation Plan detailing the recommended implementation approach.
- > Prepare a final Implementation Plan incorporating CVWD and CSD review comments.

1.3 CVWD & CSD Coordination

- > Engage, collaborate, and coordinate with CVWD and CSD.
- > Facilitate and/or participate in impromptu meetings, phone/conference calls, and site visits.
- Support and facilitate information sharing and knowledge transfer.
- Provide technical expertise when needed to advise CVWD and CSD on key decisions related to final design and permitting phase.
- Assumption: Budget is based upon an assumed level of effort for this task of 24 hours per month for 18 months.

Scope of Services: CAPP Program Management and Construction Management

1.4 Team Meetings

- CVWD and CSD Meetings
 - (1) Plan, organize, conduct, and document meetings with CVWD and CSD to discuss CAPP status, coordination needs, resource requirements, CAPP risks, and key issues. Monthly meetings are assumed.
 - (2) Assumption: The budget is based on 18 meetings with a 1.5-hour duration.
- CAPP Team Meetings
 - (1) Plan, organize, conduct, and document bi-weekly (i.e., twice per month) with the CAPP Team to:
 - (a) Provide updates on CAPP progress
 - (b) Present interim results
 - (c) Review data needs
 - (d) Discuss key issues and other topics of interest as CAPP progresses
 - (2) Assumption: The budget is based on 36 meetings with a 1-hour duration.

1.5 Board Updates

- Prepare and participate in board meetings for CVWD and CSD, including joint Board or committee meetings, to provide updates on CAPP status and key CAPP milestones.
- Assumption: The budget is based on CAPP Team participation in six (6) board meetings with a two-hour duration.

1.6 Non-Recurring Meetings

- Prepare and participate in meetings scheduled as needed with CVWD, CSD, and/or the CAPP Team members.
- Assumption: Budget is based upon an assumed level of effort for this task of 8 hours per month18 months.

Deliverables: Monthly Invoices and Progress Reports, Draft and Final Implementation Plan, Meeting Agendas and Meeting Summaries.

TASK 2.0 PROGRAM CONTROLS

2.1 Data Management

- Develop and maintain a management information system (MIS) using the Microsoft Office suite to manage CAPP documentation and facilitate access to CAPP documents by CVWD and CSD staff.
- > Provide MIS training resources to new CAPP team members, as needed.
- Assist CVWD and CSD staff in the development of procedures for management and tracking of CAPP-related information as required by funding sources.
- Manage data requests, and provide information, design criteria, and technical standards to CAPP team members and stakeholders.
- > Assumption: The budget is based upon an assumed level of effort of 4 hours per month.

7/7/2022

Scope of Services: CAPP Program Management and Construction Management

2.2 Schedule Management

- Develop an updated CAPP schedule for permitting and final design through CAPP completion based on the Implementation Plan prepared in Task 1.2. Incorporate detailed schedules from CAPP Team members.
- > Maintain and monitor CAPP schedule. Provide updates on a quarterly basis.
- > Incorporate construction schedules when submitted
- Assumption: The schedule will be updated quarterly. After the schedule is developed, the budget is based upon an assumed level of effort of 4 hours per quarter.

2.3 Cost Management

- Compile and monitor budget, cost, and cash flow information for CAPP. Update CAPP budget and produce budget and cost projections monthly.
- Assist CVWD and CSD staff in the development of accounting procedures to track CAPP-related expenditures, grant funding, and loan disbursements as required by funding sources.
- Monitor scope, including tracking approved out of scope work.
- Assumption: The program cost will be updated monthly. After the budget tool is developed, the budget is based upon an assumed level of effort of 4 hours per month.

2.4 Change Management

- Coordinate with CAPP Team to proactively manage changes to scope and/or budget of CAPP and implement change management procedures.
- Assumption: A total of 80 hours is assumed for this task.

2.5 Risk Management

- Identify CAPP risks and develop mitigation measures and contingency plans. Document these in a CAPP risk register.
- Characterize, quantify, and prioritize CAPP risks utilizing CAPP risk register, and analyze impacts on CAPP budget and schedule.
- Implement risk mitigation measures identified through risk characterization efforts as applicable.
- > Prepare monthly CAPP risk register updates.
- Assumption: The risk register will be updated monthly. After the budget tool is developed, the budget is based upon an assumed level of effort of 4 hours per month.

2.6 Program Status Reports

Provide six (6) quarterly status updates in a dashboard format that summarize CAPP performance relative to the baseline CAPP budget and schedule and summarize activities completed in current quarter and planned for the next quarter. Quarterly status updates will be distributed to the Project Team via email.

Deliverables: Program Schedule and Updates, Cost Projections and Updates, Risk Register and Updates, Program Status Reports

TASK 3.0 FUNDING AND FINANCING SUPPORT

3.1 Funding and Financing Strategy

- Identify applicable funding and financing sources and criteria, including availability, eligibility, application process, and schedule.
- Engage with funding agencies to determine funding opportunities, constraints, requirements, and logistics.
- Screen applicable sources based on eligibility criteria, funding availability, CAPP goals and objectives, and/or CAPP constraints.
- Define a funding and financing portfolio, including one or more outside funding sources as well as internal CVWD and CSD funding and financing.
- Develop a cash flow model and funding plan to meet cash flow requirements for the duration of CAPP. The cash flow model will reflect expected processing and payment timelines from funding sources. Cash flow model will be maintained and updated as part of Task 2.3.

3.2 Clean Water State Revolving Fund Loan Support

- > Coordinate with the SWRCB Division of Financial Assistance (DFA).
- > Coordinate with CVWD to address loan requirements and requests from the SWRCB.
- > Prepare formal responses to information requests from the SWRCB.
- > Assumption: The budget is based upon an assumed level of effort of 80 hours.

3.3 Proposition 1 IRWM Grant Support

CAPP is anticipated to be included in the 2022 DWR IRWM grant application from Santa Barbara County. To support grant acquisition, WSC will:

- > Coordinate with DWR and Santa Barbara County (regional IRWM grant administrator).
- Prepare requested grant application materials (grant will be submitted by Santa Barbara County).
- > Respond to information requests to fill grant application data gaps.
- Support grant contract negotiations.
- > Assumptions: The budget based upon an assumed level of effort of 80 hours.

3.4 Title XVI Grant Support

If the USBR awards CAPP funding from the Fiscal Year 2022 (FY22) Title XVI Water Infrastructure Improvements for the Nation (WIIN) project implementation grant, WSC will provide the following services:

- Coordination with USBR, which includes coordination, preparation, and attendance at calls to agreement documentation and requirements.
- > General email correspondence and impromptu phone calls with USBR are anticipated.
- Coordination with CVWD to discuss USBR requirements and prepare information as necessary in advance of attending meetings with USBR.
- > Assumption: The budget is based upon an assumed level of effort of 80 hours.

PACKET PAGE 43 OF 181

5

Carpinteria Valley Water District Scope of Services: CAPP Program Management and Construction Management

3.5 Grant Application

- > Professional services may be required to investigate, prepare, and submit a grant application.
- Grant or loan application level of effort is dependent on the grant or loan CAPP. An estimate of \$40,000 is included based on WSC's previous grant application efforts for CAPP.

Deliverables: Funding Opportunity Table, Grant Application

TASK 4.0 PERMITTING SUPPORT

Note that a CEQA Addendum is not included in this scope. In addition, the following permits are assumed to not be needed: United States Army Corps of Engineers Section 404 permit, Regional Water Quality Control Board Section 401 Water Quality Certification, and California Department of Fish and Wildlife 1600 Streambed Alteration Agreement. These services are included as optional tasks, if needed.

4.1 Coastal Development Permit Support

A Coastal Development Permits (CDP) from the City of Carpinteria will be required for infrastructure in the coastal zone.

- WSC will prepare the CDP application and support CVWD in negotiations with the City. Support services may include:
 - (1) Participation in meetings with CAPP Team and the City.
 - (2) Prepare application materials and prepare revisions to the application or additional information requested by the City
 - (3) Preparation of exhibits detailing Program improvements and construction requirements.
- > Assumption: The budget is based upon an assumed level of effort for this task of 160 hours.

4.2 Title 22 Engineering Report

A Title 22 Engineering Report approved by the SWRCB Division of Drinking Water (DDW) is required for the WDR/WRR permit.

- > Engage DDW as needed to support report preparation.
- Lead regulatory discussions on the permit documents and meet with regulatory staff to attain regulatory approval.
- Update current Title 22 Engineering Report and Prepare Admin Draft report compliant with DDW requirements. Work includes compilation of existing material in accordance with DDW standards as well as development of some new materials. DDW requires potable reuse facilities meet an extensive list of performance criteria for pathogens, nutrients, and trace pollutants. Treatment system performance information from other potable water reuse facilities may be required to provide an accurate estimation of future performance for Central Coast Blue.
- > The Engineering Report will detail the following issues:
 - (1) Potable Reuse program summary
 - (2) Participating partners; including roles, responsibilities, and contractual relationships
 - (3) Summary of CEQA related items
 - (4) Summary of stakeholder outreach and coordination

7/7/2022

Scope of Services: CAPP Program Management and Construction Management

- (5) Potable reuse regulatory requirements
- (6) Summary of infrastructure (treatment, conveyance, injection, extraction) for the potable reuse project
- (7) Source water quality for potable reuse, including description of industrial pretreatment and source control program.
- (8) Pathogen and pollutant control and treatment
- (9) Potable reuse operational strategy, including groundwater recharge and extraction schemes. All groundwater analysis and modeling will be done by others.
- (10) Development of monitoring and response retention time requirements
- (11) Review of alternative water sources
- (12) Demonstration of potable reuse water quality
- (13) Summary of groundwater basin and basin water quality
- (14) Summary of domestic water supply production wells
- (15) Groundwater recharge impacts, including anti-degradation analysis
- (16) Development of a Monitoring and Reporting Program
- (17) Potable Reuse Operations Plan
- (18) Summary of startup testing requirements
- Incorporate comments from CVWD and CSD on the Admin Draft Report and prepare a Draft Report for submission to DDW.
- Review and discuss DDW comments on the Draft Report. Engage with DDW to address comments
- Prepare Final Report for submission to DDW for approval
- Assumptions: Content for groundwater related topics, such as groundwater modeling, will be prepared by Pueblo Water Resources. Content related to the AWPF, such as operations plan, will be prepared by the Design Engineer.
- Assumptions: Budget does not include generation of new data, unless specifically listed above, and is assumed to rely on existing reports and information. Any new data would be sampled and analyzed by others, based upon recommendations by the Program Team.
- Assumption: The budget is based on up to three (3) DDW meetings, attended remotely, by three
 (3) Program Team staff with a duration of 1.5 hours.

4.3 Waste Discharge Requirements / Water Recycling Requirements Permit

CAPP will require a new Waste Discharge Requirement (WDR) / Water Recycling Requirements (WRR) permit to inject purified water into the groundwater basin.

- > Coordinate the efforts of CAPP Team and RWQCB.
- > Engage RWQCB as needed to support the application.
- > Coordinate and support additional geochemical analysis requested by the RWQCB.
- Coordinate and support additional antidegradation analysis requested by the RWQCB.
- Prepare the ROWD for review and approval by RWQCB. The ROWD will detail the following issues:
 - (1) Potable Reuse program summary
 - (2) NPDES Summary for the relevant utilities

Scope of Services: CAPP Program Management and Construction Management

- (3) Documentation of water and wastewater characteristics
- (4) Summary of primary, secondary, and advanced treatment facilities
- (5) Summary of treatment and recharge operations
- (6) Recycled water rules and regulations
- (7) Documentation of best management practices, including industrial pretreatment, laboratory monitoring, etc.
- (8) Groundwater quality assessment
- (9) Anti-degradation analysis
- Incorporate comments from CVWD and CSD on the Admin Draft ROWD Report and prepare a ROWD for submission to RWQCB.
- > Review and discuss DDW comments on the ROWD. Engage with RWQCB to address comments.
- > Participation in one (1) public hearing is assumed.
- > Prepare supplemental materials for submission to RWQCB for approval
- Assumptions: Antidegradation analysis and geochemical analysis to be conducted by a subconsultant. Placeholder budget for the subconsultant is included in expenses.
- Assumption: The budget is based on up to three (3) RWQCB meetings, attended remotely, by three
 (3) Program Team staff with a duration of 1.5 hours.

Deliverables: Meeting Agendas and Meeting Summaries; Admin Draft, Draft, and Final Title 22 Engineering Report; Draft and Final Report of Waste Discharge

TASK 5.0 DESIGN OVERSIGHT

5.1 Consultant Selection

- > Develop Request for Proposal (RFP) for Design Engineer.
- > Develop selection criteria for consultant selection
- Support process to select Design Engineer.

5.2 Consultant Coordination

- Manage and monitor the work of Design Engineer through design completion. Manage the review of regular submittals and reviews of documents.
- Review designers progress against the project schedule and recommend corrective action as needed.
- Attend regular progress meetings (assume 36) with the designer, including routine management and status meetings, focused design meetings, and design review workshops.
- > Provide existing information, design criteria, and technical standards to Design Engineer.
- > Research, compile and provide other available information requested by Design Engineer

Scope of Services: CAPP Program Management and Construction Management

5.3 Design Submittal Review

- Review design submittals including plans, specifications, calculations, cost estimates, geotechnical report, study reports, startup and testing plans, etc. for completeness and consistency with the Preliminary Design and CAPP objectives. This includes discipline specialists, such as civil, mechanical, process, electrical, geotechnical, architectural, structural, etc. Coordinate comments and assist in resolving conflicting comments.
- Review, evaluate, and provide recommendations to CVWD and CSD for its determination, any requests for scope changes during design.
- Provide technical expertise when needed to advise CVWD and CSD on key decisions during design.
- > Participate in design workshops for 60%, 90%, final, and bid submittals.
- Assume separate workshops for distribution system, wells, and AWPF for each submittal for a total of 12 workshops.

5.4 Biddability and Constructability Review

Perform constructability reviews for 50% and 60% design submittals, and biddability review at 90%. This includes scope, schedule and cost estimate review, as well as discipline specialists, such as civil, mechanical, process, electrical, geotechnical, architectural, structural, etc. Coordinate comments and assist in resolving conflicting comments.

5.5 Permitting Support

- Design Engineer will lead preparation on construction permits, which may include, City encroachment permit, County well permit, SWPPP, NPDES, and Air Pollution Permit packages.
- Review draft permit applications
- > Provide existing information and studies as needed
- > Participate in meetings with permitting agencies, as needed
- Review, evaluate, and provide recommendations to CVWD and CSD for its determination, any requests for scope changes during design.
- > Provide technical expertise when needed to advise CVWD and CSD on key decisions.
- > Assumption: This budget is based upon an assumed level of effort of 60 hours.

5.6 Equipment Pre-Selection

- Pre-selection of the MF, RO, UV-AOP systems will allow CVWD and CSD to make a value-based selection of the major mechanical equipment based on criteria established by CVWD and CSD (e.g., capital cost, lifecycle cost, operational requirements, etc.). Pre-selection of these systems will also facilitate progression of the AWPF 60% design submittal. The pre-selected equipment packages will be assigned to the construction contractor as part of the AWPF bid package.
- WSC will provide oversight of Design Engineer's preparation of equipment pre-selection procurement packages
- Coordinate with the CAPP Team to develop the minimum qualifications and proposal evaluation criteria prior to issuance of requests for proposals.

Scope of Services: CAPP Program Management and Construction Management

- Plan, organize, conduct, and document a workshop for each procurement package to determine scope of supply and to facilitate development of minimum qualifications and proposal evaluation criteria. Each workshop is assumed to be two (2) hours in duration.
- Coordinate with City legal counsel to facilitate development of contract language related to assignment of procurement packages and requirements from funding and financing sources (e.g., DBE outreach, federal cross cutters, American Iron and Steel, etc.).
- > Plan, organize, and conduct pre-proposal meetings for each procurement package.
- Evaluate proposals received and coordinate with Partner Agency staff to identify the preferred vendor.
- Assumptions: CVWD, CSD, and their legal counsel will develop contract language for contract assignment and to satisfy requirements from funding and financing sources (e.g., DBE outreach, federal cross cutters, American Iron and Steel, etc.). One (1) addendum will be prepared for each procurement package.

5.7 Value Engineering of 60% Design

- Coordinate and conduct a Value Engineering (VE) Workshop of 60% Design. The VE Team will include a Value Engineering Team Coordinator and four to five VE Team Members. The following tasks are included:
 - (1) Coordination
 - (2) VE Review of Project Information
 - (3) VE Kickoff Call
 - (4) VE Review of Construction Cost Estimate
 - (5) VE Workshop
 - (6) VE Report

Deliverables: Meeting Agendas, Meeting Summaries, Comments on 60% Design Package, 90% Design Package, Final Design Package, and Bid Package; Draft and Final VE Report for 60% Design

TASK 6.0 BID PHASE SUPPORT

6.1 Contractor Pre-Qualification

- > Prepare notice inviting contractors to submit a proposal for pre-qualification.
- Prepare a prequalification package for the plant and instrumentation and controls subcontractor based on DIR's standard pre-qualification materials
- Coordinate and participate in pre-qualification package evaluation, including:
- Review pre-qualification packages;
- Prepare evaluation criteria;
- > Prepare pre-qualification responses.
- > Prepare letter recommending pre-qualified contractor's to be invited to bid.

PACKET PAGE 48 OF 181

Scope of Services: CAPP Program Management and Construction Management

6.2 Bidding

- > Prepare the Notice Inviting Bids from the pre-qualified contractors.
- > Attend a pre-bid conference as CVWD's representative.
- > Respond to bidder inquiries as appropriate and provide input for program-related addenda.
- Coordinate with Design Engineer to review the acceptability of substitute materials, equipment, subcontractors and suppliers proposed during the bid process.
- Tabulate all bids received, review responsiveness of bids, and make a recommendation for award.
- > Assumption: This budget is based upon an assumed level of effort of 60 hours.

Deliverable: Award Recommendation Letter

TASK 7.0 CONSTRUCTION MANAGEMENT

Construction management and inspection services throughout the construction and startup phases of the Project include:

- Construction Management and Inspection
- Materials Testing and Engineering
- Survey verification/checking of contractor's work

The level of effort included in the fee is based on four staff at mostly full-time for 18 months: construction manager, resident engineer, and two inspectors / document managers. A more refined estimated will be submitted prior to the start of the construction phase.

7.1 Project Set Up

WSC will complete the following tasks:

- Prepare a Project-specific construction management plan containing the specific procedures to be followed for the Project. This plan will include the "chain of command" and the roles and responsibilities for all project team members (including but not limited to: who will perform them, and to what degree and frequency the tasks will be executed, etc.) and define the project tracking and reporting procedures. The primary purpose of this plan is to define the level of project administration, public relations, and communications.
- Compile construction phase engineering services scope of work for CM's subconsultants (materials testing, geotechnical services and construction field survey – verifying contractor's survey).

7.2 Construction Contract Administration

- Meetings
 - (1) Conduct the pre-construction meeting and prepare and distribute meeting summary.
 - (2) Conduct weekly meetings with the contractor, subcontractors, utility representatives, design team representatives, and CVWD representatives. Prepare meeting summary and distribute to all participants.

Scope of Services: CAPP Program Management and Construction Management

- RFI/RFC: Review, coordinate (with CVWD and design engineer), and respond to contractor's Requests for Information (RFI) and Requests for Clarification (RFC).
- Change Management Review and process change orders. When appropriate, recommendations, suggestions and alternatives will be provided to the contractor, and/or CVWD.
- Change Orders: Manage the change order process to defend CVWD against unwarranted change orders and to obtain a fair and reasonable price for those items determined to be extra-work items. Change order requests from the contractor will be received and logged along with requests by CVWD and recommendations of the design engineering team. Upon resolution of the issues and costs, the CM will recommend acceptance or rejection of the change order and, if accepted, prepare the document for processing. The CM will verify changes performed with detailed justification on a time- and-materials basis daily.
- Files: Maintain a set of contract files at CM's office and files at CM's field office (located at construction site). The document tracking will be conducted using software to log, track and process all correspondence, submittals, RFIs/RFCs, cost quotations, potential change orders, change orders, claims, progress payment requests, and other documents received at the field office. At the completion of the Project, the master set of project related files will be indexed and turned over to CVWD.
- CPM: Perform a detailed review of the contractor's baseline "critical path method" (CPM) schedule to analyze the logic between activities, key activity durations, proper cost loading, and verification of the critical path. This will confirm that all specified construction sequencing and schedule constraints, as well as all submittals; construction, shutdowns, tie-ins, startup and testing, and closeout activities are included for all contract work. Review the schedule to check for any logic that places undue burden on CVWD, the CM, or design engineer, such as accelerated submittal review and need for increased CVWD and CM resources. Detailed reviews of the contractor's monthly schedule update will be conducted to ensure that actual work progress, based upon the contractor's and CM's records, is properly incorporated including any approved change order work. The CM will prepare written recommendations to CVWD on contractor requests for contract time extension, and will include a time impact analysis.
- Extra Work: Track and manage all extra work items through a tracking system. Disputed work items unable to be processed as a change order will be tracked via a potential claims system, and reasonable effort should be made by the CM to resolve the issue.
- Compliance: Review compliance with contractor's documents, contractor's monthly progress payment requests, as well as construction contract records and reports specified to be submitted. Compile written recommendations and forward to CVWD.
- Payment Requests: Compare the contractor's progress payment requests to the schedule of values and their own daily and weekly report records to confirm that the requested amounts are consistent. This will include confirmation of "materials on hand" by checking materials stored on site with paid invoice records. Appropriate contract change order work will also be confirmed and included. The CM will then recommend to CVWD the monthly progress payment amount. A copy of the progress payment will be included in each Monthly Progress Report.

Scope of Services: CAPP Program Management and Construction Management

Punch List: Punch lists will be developed to permit CVWD acceptance of each segment of work to occur after the contractor attains substantial completion. Conduct a final project review with CVWD project manager and grant agencies as required. Submit a recommendation for project acceptance.

7.3 Submittal Review Processing

- Receive and consolidate the contractor's submittals of equipment operations and maintenance manuals, warranties and guarantees for materials and equipment installed in the Project. This effort will be concurrent with the final testing and project closeout phase.
- Coordinate closely with the contractor, equipment vendors, design engineering team, other CMs, and CVWD's operations staff during the development of the contractor's startup and commissioning plan. This plan will contain a pre-commissioning checklist and a systematic startup procedure, as required by the contract specifications.
- Coordinate preparation and review of record drawings. Provide evidence to CVWD that the contractor maintained record drawings.
- Coordinate with the contractor in order to verify that Storm Water Pollution Prevention and Waste Discharge Requirements are in compliance. The CM will review the Storm Water Pollution Prevention Plan (SWPPP) initially prepared by CVWD or the Design Engineer and then revised by the contractor and provide recommendations to any necessary revisions. The CM will enforce the requirements of the approved SWPPP with the contractor. The CM will confirm that the contractor meets specified construction mitigation requirements as outlined in the approved SWPPP in order to minimize the potential for violations with the Project's Stormwater Construction NPDES permit condition.
- > Coordinate with the contractor on acquisition of other construction permits.

7.4 Start Up, Commissioning And Project Closeout

- In general, assist in facilitating commissioning and startup of Project facilities including longterm operational support by contractor and/or manufacturers. Coordinate with CVWD on overall project closeout including substantial completion, pre-final inspection and final completion.
- Receive and review O&M Manuals prepared by the contractor and coordinate comments from both CVWD and CVWD's treatment operations consultant and ensure that all comments from the reviewers are addressed prior to having the contractor finalize the documents. Transmit to CVWD; and deliver all keys, manuals, records drawings and maintenance records to CVWD.
- AWPF: Coordinate the Treatment Process and SCADA specialty teams (from both CVWD and Design Engineer) and operations consultant on operational matters; including troubleshooting and fine-tune operations procedures.
- Pipelines: Coordinate with CVWD and Design Engineer on operational matters, including pressure testing and disinfection of pipelines prior to putting the pipelines into operation. The coordination efforts include: troubleshooting and fine-tuning operations procedures.
- Wells: Coordinate with CVWD and Design Engineer on development and equipping of project wells.

Scope of Services: CAPP Program Management and Construction Management

- Facilitate final inspection and approval to operate all Project facilities; including but not limited to: treatment processes, generator, distribution pipeline, injection wells, monitoring wells, and air quality permitting.
- Facilitate administrative close out of the project with the Contractor and funding agencies. Anticipated efforts include issuing certificates of completion for recording by CVWD, collecting and documenting warranty items, coordinating withholdings, releases of retention, issuing opinion letters to grant agencies that the project is complete,

OPTIONAL TASKS

OPTIONAL TASK 1.0 STRATEGIC COMMUNICATIONS AND STAKEHOLDER OUTREACH

Prepare communications collateral, as needed, and as requested by CVWD. Potential materials include

- CAPP Summary Brochure
- Presentations
- Elected Official Talking Points
- Press Release and News Articles
- Social Media
- ➤ Video
- > Assumption: The budget is based upon an assumed level of effort of 80 hours.

OPTIONAL TASK 2.0 ENHANCED SOURCE CONTROL PROGRAM DEVELOPMENT

An enhanced source control program (ESCP) will serve as the guidance document that will supplement an existing pretreatment program to protect an AWPF. However, since the CSD has neither an ESCP nor a pretreatment program, an ESCP must be developed that includes pretreatment program elements. Elements that will be included in the ESCP are described in the following subtasks. The Assumptions and Deliverable s for this section are provided at the end of this section.

O2.1 Industrial Waste Survey (IWS)

An IWS will be conducted to identify and location of Industrial Users (IUs) in the CSD's sewershed that have the potential to discharge wastewater that could impact the wastewater treatment plant (WWTP) and AWPF, and help the CSD determine whether pretreatment standards and requirements apply to any of the facilities surveyed. The results of the IWS will be used to prepared and maintain a list of industries and select commercial types (SIUs, dentists, medical facilities, automotive shops, etc.). Protocols to update the IWS regularly will be developed.

Scope of Services: CAPP Program Management and Construction Management

O2.2 Sewer Use Ordinance (SUO) Update

The CSD's existing SUO will be updated to give the CSD legal authority to implement and enforce all elements of the pretreatment program and ESCP. Discharge prohibitions will be expanded. Policies for IU permitting and monitoring requirements will be established.

O2.3 Enforcement Response Plan (ERP)

An ERP will be developed to give the CSD formalized procedures for investigating and responding to instances of IU noncompliance. An ERP will give the CSD a basis for enforcing IU noncompliance in a consistent manger. It will be based on the CSD's legal authorities and IU requirements established in the ordinance. It will provide guidelines for enforcement steps and escalating enforcement steps, depending on the nature of the noncompliance.

O2.4 Source Mapping & Collection System and Treatment Plant Monitoring Program

- A source mapping strategy will be developed to investigate contaminant sources with a focus on drinking water and NPDES permit-related contaminants. The program will define areas and strategies for routing monitoring including major junctions in the collection system. The objective is to build a database for the CSD to perform long-term monitoring and trending.
- In order to assure regulators that the CSD understands their influent wastewater and maintains compliance, the CSD will need to develop a robust monitoring program that expands upon its current monitoring programs. Both proactive monitoring and a rapid response action plan will be needed. A proactive monitoring program includes maintaining an inventory of contaminants, a thorough characterization of the industrial and residential wastewater quality, routing sampling of industries and commercial businesses, and online monitoring. A rapid response action plan is needed to respond to elevated concentrations, tracing up through the wastewater treatment plant and collection system, and establishing sampling zones. A procedure for taking specific rapid actions to track the source of pollutants up through the collection system and act fast to protect the finished water will be a key part of the action plan.

O2.5 Funding and Resources Report

To ensure that the CSD will have sufficient resources and qualified personnel to carry out the monitoring, enforcement, and outreach, a Funding and Resources report will be prepared. The Funding and Resources document will detail the staffing, equipment, and budgetary needs of the pretreatment and enhanced source control programs.

O2.6 Outreach Program Plan

The first line of defense against unwanted discharges in the collection system is a robust outreach program for both industrials users (IUs) and the general public. The purpose of the outreach strategy is to communicate the need for an ESCP in protecting the pure water facility as well as the role that that IUs and the public will play. This plan will summarize a proposed outreach approach with recommendations for both targeted outreach to and education of the CSD's various collection system users while maximizing existing resources and communication vehicles.

Scope of Services: CAPP Program Management and Construction Management

O2.7 Sampling Plan and Implementation

Depending upon the information collected and compiled in earlier ESCP efforts, sampling of the collection system will range from limited to extensive. Due to the expected domestic and restaurant nature of the Pismo Beach collection system, sampling is anticipated to be minimal. The sampling and implementation plan will detail what sampling should be done for the different identified industrial dischargers as well as for residual sectors to verify anticipated sewage quality.

O2.8 Enhanced Source Control Program Guiding Document

- > An ESCP guidance document will be developed that encompasses the aforementioned efforts.
- Assumptions: All sampling and laboratory analysis will be done by others. Program Team will recommend sampling that is needed.

Deliverables: For each Subtask (e.g., 02.1 to 02.8), a Draft Subtask Document will be prepared for review, followed by one comprehensive Final Document.

OPTIONAL TASK 3.0 PERMITTING SUPPORT

O3.1 CSD WWTP NPDES Permit Modifications

This task provides technical support to CSD if CSD need to modify its existing WWTP National Pollutant Discharge Elimination System (NPDES) permit for ocean discharge because RO concentrate will be added to the existing ocean outfall discharge and secondary effluent flows to the ocean will be reduced.

- Three (3) meetings are assumed with the RWQCB: 1) Initial scoping meeting; 2) Preliminary findings meeting; and 3) Final findings meeting.
- Document expected effluent water quality with and without Program discharges for NPDES constituents of concern.
- Prepare and submit draft memorandum documenting proposed Project discharge to CSD for review. Address comments in draft final memorandum and submit to the RWQCB for consideration.
- Incorporate RWQCB comments in final memorandum and transmit document to RWQCB for attachment to existing NPDES permit.
- Assumptions: The permit modification requirements and process will be determined in initial meeting with the RWQCB. Therefore, the scope and budget included in this task is based on our expected requirements and process but may need to be amended after RWQCB meeting(s).

O3.2 Environmental Permitting Support

The following environmental permits may be required: United States Army Corps of Engineers Section 404 permit, Regional Water Quality Control Board Section 401 Water Quality Certification, and California Department of Fish and Wildlife Streambed Alteration Agreement. If needed, the following scope would be implemented

WSC will prepare permit application materials on an as-needed basis. Support services may include:

Scope of Services: CAPP Program Management and Construction Management

- (1) Participation in meetings with CAPP Team and jurisdictional agencies.
- (2) Preparation of technical information and exhibits.
- (3) Responding to requests for information from jurisdictional agency staff.
- Assumption: The budget is based upon an assumed level of effort for this task of 24 hours per permit application for three (3) permits for as-needed support for a total of 72 hours. It is assumed that additional discretionary permits from California Department of Fish and Wildlife, United States Army Corps of Engineers and others will not be required.

O3.3 Environmental Impact Report Addendum Support

An Environmental Impact Report (EIR) addendum is needed if facilities, such as wells, are located in areas not covered by the Final Program EIR. The EIR addendum will be prepared by the City's environmental consultant. WSC will support preparation of the EIR addendum on an as-needed basis. Support services

may include:

- > Participation in meetings with staff, consultant, jurisdictional agencies, and stakeholders.
- Preparation of technical information to support preparation of supplemental EIR documentation.
- > Assistance to consultant to develop the project description.
- > Assumption: The budget is based upon an assumed level of effort for this task of 80 hours.

Questions?

Dylan Wade PE, CCM

PROFESSIONAL EXPERIENCE

Dylan Wade is a professional engineer with over 22 years of professional experience including structural design, resident engineering, construction management, project delivery, and utility management. Dylan has served as the Owner Representative on many large, high-profile and multi-jurisdictional water resources projects including design and construction of intake facilities, water treatment plants, wastewater treatment plants, and major public works programs. These projects have been tremendous successes and some have won national recognition. He is responsible for managing numerous projects from initial planning to finished product. Dylan's extensive utility experience enables him to solve problems from an owner's perspective, while his construction background and expertise in contract management facilitates successful project delivery.

REPRESENTATIVE PROJECTS

Program and Construction Management

Cayucos Sustainable Water Project, Cayucos Sanitary District, CA. Program Manager/

Engineer of Record. Provided the planning, design, program management and construction management for a program to create a sustainable water source for the community of Cayucos, cummulating in the design and construction of a 1.2 mgd (max day) greenfield Water Resource Recovery Facility. Program Management services included alternative project delivery, schedule management; stakeholder outreach coordination; meeting coordination and facilitation; risk management; and subconsultant management. Project development included project chartering, wastewater characterization, siting analysis, funding and financial strategy, rate setting, Proposition 218 process, wastewater collection system evaluation, and \$28 million dollars of USDA grants and low interest loans. Project also required evaluating regulatory and permitting requirements of potential disposal and beneficial use alternatives and coordinating with the Regional Water Quality Control Board for a new National Pollutant Discharge Elimination System (NPDES) permit and the permitting of a new ocean outfall through the California Coastal Commission. Prepared the design packages for the multiple

projects in the program and provided construction management and engineering services during construction of the WRRF, which includes a Lift Station, Pipeline project with directional drilling under Toro Creek, Coarse Screens, Fine Screens, Grit Removal, Equalization, Membrane bioreactor and UV disinfection treatment processes for California Title 22 compliance, Dewatering facilities, Chemical Storage and feed systems, pump stations, Operations and Maintenance Facilities, Well based Potable Water System, tanks, piping, and associated appurtenances. Lead a value engineering and rebid of a project Lift Station project to produce over \$1.4 millon is project savings in a two month period.

Central Coast Blue, City of Pismo Beach and the Northern Cities Management Area Technical Group, Pismo Beach, CA. *Technical Advisor.* Providing Program Management, Preliminary Design, Funding, and Environmental Document Support services for the Indirect Potable Reuse project with advanced treatment facility using microfiltration or ultrafiltration, reverse osmosis, and ultraviolet radiation and advanced oxidation process before being injected into the Santa Maria Groundwater Basin to supplement groundwater supplies and protect the basin from seawater intrusion.

MUSC

PROFESSIONAL REGISTRATIONS

Professional Engineer - Civil, California, No. C64044

Certified Construction Manager – No. 5761

"I love working in the water and wastewater industry, where we get to make the world a better place while also making a difference for the communities we serve."

Dylan Wade

Dylan Wade PE, CCM continued...

North Pleasant Valley Groundwater Desalter, City of Camarillo, CA.

Technical Advisor. This groundwater treatment facility will treat 4,500 AFY of brackish groundwater using reverse osmosis to yield up to 3,800 AFY of potable water, which will more than double the City's water supply. Provided assistance to the program management team including assisting the City in procuring design engineering permitting, and property acquisition services, as well as annexation support, public outreach support, and funding support.

Water Resource Recovery Facility Project, City of San Luis Obispo, CA.

Technical Advisor. Providing Program Management services for the City's seven year, \$156 million Water Resource Recovery Facility (WRRF) upgrade project from planning through commissioning. Responsibilities include management of scope, schedule, and quality of the program, contract management for multiple contracts, coordination with the SST program, assessment of renewable energy opportunities, coordination with other City departments, set up of data management system, and general program administration.

Design-Build San Clemente Dam Removal and Carmel River Reroute Project, California American Water, Monterey, CA. Construction

Manager/Project Manager. Project included the re-routing and reconstruction of the Carmel River and removing the San Clemente Dam. This project is the largest dam removal project ever completed in California and required close coordination with Department of Water Resources Division of safety of dams. Project was implemented as a public-private partnership between California American Water, the California Coastal Conservancy, and the National Marine Fisheries Service using the design/ build delivery method.

Owner's Representative, Wastewater Treatment Plant Upgrade, Brackish Water Reverse Osmosis (BWRO) Design Build Project, City of Morro

Bay, CA. *Project Manager.* Owner's Project Manager for the development of a \$34 million wastewater treatment plant upgrade project with preliminary design complete, CEQA complete, Coastal Development Permiting efforts, and SRF funding anticipated. Emergency design and retrofit of BWRO treatment trains for an existing desalination plant include acquiring both CDPH and NPDES revised permits.

Water Reclamation Facility Alternatives Analysis City of Atascadero,

CA. *Principal In Charge.* Oversight and technical guidance for alternatives analysis for the City of Atascadero's WRF for treatment compliance relative to current and future regulations. The initial alternatives analysis establishes effluent limit targets, updates WRF flows and loads, and creates two alternatives for further economic and non-economic evaluations. The proposed alternatives include upgrading the current planned improvements to include membrane or MBR filtration with side stream reverse osmosis for salt reduction. The final alternatives will depend on effluent limits, specifically Total Dissolved Solids (TDS) and chloride. The alternatives will also be evaluated using a pair-wise analysis that considers: 1) ability to meet shifting regulations, 2) flexibility for expansion to meet changing flows, 3) operational reliability, 4) environmental stewardship, 5) potential for odor, 6) redundancy, 7) level of automation, and 8) operator certifications and staffing. Cost analysis includes construction capital costs

and comparative life cycle costs, and comparative life cycle cost analysis focuses on understanding the differences in near-term and future costs for the alternatives.

Los Osos Wastewater Treatment Plant Construction, Los Osos, CA.

Resident Engineer. \$135 million program including \$35 million Wastewater Treatment Plant. Resident Engineer when the project was suspended at 5% completion through a recall election and agency default on an SRF loan. This created unique financial and legal ramifications ultimately resolved through state legislative action. Participated in the development of approximately \$10 million in value engineering at the time the work was stopped.

EA Fairbairn Water Treatment Plant (\$53.9M) and Intake (\$14M), City of Sacramento, CA. Construction Manager/Resident Engineer. Led the E.A. Fairbairn Intake project, located in the American River, completed one year early and under the original budget. Designed the retrofit and expansion of the existing structure with fish screens, diffuser plates, and a seismic retrofit. Served as Owner's representative for this project from construction of the coffer dam slab to the fish screen dive inspection by NOAA and facility start-up.

Water Reclamation Facility Upgrade, Heritage Ranch Community Services District, Paso Robles, CA. Project Manager. Lead for design services for upgrading the District's WRF for compliance with National Pollutant Discharge Elimination System (NPDES) requirements and a Time Schedule Order (TSO) for copper, un-ionized ammonia, and nitrate effluent limits. The project replaces the District's secondary wastewater treatment pond system with a new membrane bioreactor (MBR) system. Critical project elements include selecting the optimal site configuration and process options; procuring equipment quickly, competitively, and cost-effectively; efficiently navigating environmental and permitting requirements; providing accurate cost estimating; integrating lifecycle costs; and assisting in meeting United States Department of Agriculture (USDA) requirements and identifying other funding/financing opportunities.

Lopez Lake Water Treatment Plant Upgrade, San Luis Obispo County,

CA. *Resident Engineer.* \$15 million upgrade to the WTP. Upgrades included owner-procured membrane filtration, chlorine dioxide generation equipment, and significant SCADA modifications on an aging operational plant.

Marre Weir Fish Passage & Seawater Intrusion Barrier Project, San Miguelito Mutual Water Company, Avila Beach, CA. Project Principal. Responsible for facilitating the development of a local coalition to improve fish passage through the Marre weir. Lead a technical team conducting condition assessment of the Marre Weir and prepared a sea level rise analysis. Prepared a technical memorandum of findings and presented to the technical advisory committee. Led collaboration efforts between the District, state and federal regulatory agencies, non-profit organizations, and technical experts. Assisted District and project partners with the pursuit of grant funding and won a Proposition 1 grant for the design of passage improvements.

Dylan Wade PE, CCM continued...

City of Morro Bay Cayucos Sanitary District Joint Powers Authority Wastewater Treatment Plant Upgrade Project, City of Morro Bay, CA. *Project Manager*. Owner's Project Manager for the development of a \$34 million wastewater treatment plant upgrade project with preliminary design complete, CEQA complete, Coastal Development Permiting efforts, and SRF funding anticipated.

Hardy Croxton Plant and Intake Facilities Expansion, Beaver Water District, Lowell, AR. *Resident Engineer*. The Intake project included a \$13.7 million drinking water intake, large diameter pipeline, and a chlorine feed building rehabilitation as part of a \$104 million program. The construction included drilling, blasting, rock anchoring, microtunneling, significant civil work, and underwater work in Beaver Lake. The project won several awards including Trenchless Technologies Project of the Year "honorable mention" and an Association of Building Contractors "National Award of Merit."

Lopez Lake Water Treatment Plant Upgrade, San Luis Obispo County, CA. Resident Engineer. \$15 million upgrade to the WTP. Upgrades included owner-procured membrane filtration, chlorine dioxide generation equipment, and significant SCADA modifications on an aging operational plant.

Treatment and Infrastructure Planning

Development of Conceptual Alternatives for the Treatment and Disposal of Wastewater, Cayucos Sanitary District, CA. Project Manager. Performed initial data review of the wastewater treatment and disposal studies completed by the Cayucos Sanitation District (District and the City of Morro Bay. Hosted an Alternative Development Workshop with the District General Manager and members of the Board of the Directors to establish criteria for and to develop a preliminary list of conceptual alternatives. Evaluated and developed descriptions for four conceptual wastewater treatment and disposal alternatives that included potential facility locations, collections configurations, level of treatment considerations, O/M and capital cost estimates, disposal options, and key considerations for the future decision-making process.

Wastewater Collection System Infrastructure Renewal Strategy, City of San Luis Obispo, CA. QA/QC. Develop a Wastewater Collection System Infrastructure Renewal Strategy that includes the creation of a hydraulic model for the wastewater collection system, evaluation of pipeline capacity to deliver current and future loading, assessment of pipeline condition, and the development of an asset management plan to guide future capital improvement projects. Utilize spatially allocated sewer loads, based on water demands, and an all-pipes model to implement a prioritized manhole data collection strategy that enables the City to focus its surveying efforts to the capacity impacted portions of the collection system. Intersect current wastewater loading with underlying parcel and land use data to develop area-based loading factors for use in quantify loading for areas of future growth and densification. Develop a decision algorithm incorporating capacity and condition data to identify highest risk assets and prioritize replacement to limit the City's risk exposure. **On-Call Engineering Services, City of Arroyo Grande, CA.** *Technical Advisor.* Provided as-needed research and analysis support for engineering services for the City of Arroyo Grande. Research, development of materials, and coordination with other agencies regarding water supply and demand data to inform water resources management actions. Developed monthly Water Status Updates presented by City Staff to the City Council.

Chevron Tank Farm Service Extension Feasibility Study-Phase 1, San Miguelito Mutual Water Company, CA. Project Manager. Assessed the capacity of the San Miguelito Mutual Water Company's (SMMWC) water and wastewater systems under current and future conditions, including the inclusion of a proposed development at the Chevron Tank Farm. Developed water and wastewater base maps in GIS and conducting an analysis of demand, supply, capacity and storage for SMMWC's existing and projected infrastructure. Developed demand and loading estimates for the current SMMWC service area at build-out. Analyzed the projected water demand and wastewater loading from the proposed development and compared against existing SMMWC demand/loading factors and the capacity of the SMMWC's water and wastewater systems. Prepared a summary Technical Memorandum that describes the existing systems, proposed growth and recommendations completing future phases of the project.

System Energy Plan, Heritage Ranch Community Services District, CA.

QA/QC. Developing a System Energy Plan (SEP) for the Heritage Ranch CSD, which includes an assessment of energy efficiency and optimization opportunities in the water and wastewater systems and an assessment of solar PV generation opportunities in the District. Project targets high energy use facilities and will identify cost-effective energy improvement projects. Solar PV assessment includes an evaluation of permitting, grid interconnection requirements, power delivery mechanisms, funding, and overall project economics. Working with PG&E to perform subsidized pump efficiency testing.

Wastewater Collection System Assessment and Rehabilitation Plan, City of Morro Bay, CA. Capital Projects Manager. Created an asset management-based pipeline condition assessment and rehabilitation program. The cutting-edge program uses pre-designed standards, performance-based specifications, and GIS-enabled maps to reduce the rehabilitation project preparation timeline from several months to several days. Trenchless technologies were used extensively to increase repair efficiencies.

Treatment and Infrastructure Design

CSA 10A Water Tanks, County of San Luis Obispo, Cayucos, CA.

Technical Advisor. Providing QA/QC oversight for the design of a new 210,000-gallon reservoir, and the demolition and replacement of another same-sized reservoir. Tasks included reviewing site grading and piping configurations and layouts for the project.

Thousand Oaks Interconnection Projects, California American Water, Thousand Oaks, CA. Technical Advisor. Provided QA/QC review of 60% design plans and specifications for two interconnection projects in the City of Thousand Oaks. The Borchard Road project included the design for more than 300-LF of 8-inch mainline to connect CAW's system to an existing Calleguas Municipal Water District turnout connection. The Gainsborough Road project connected CAW's system to the City of Thousand Oaks' water system. WSC designed 220-LF of 8-inch pipeline and two buried vaults, one for a two-way mag meter and the other for a pressure regulating valve.

Toro Creek Bridge Pipeline Replacement, Cayucos Sanitary District, CA.

Construction Manager. Provided design and construction management services to construct a temporary bridge for an exisiting sewerline across Toro Creek while Caltrans demolishes and replaces the exisitng bridge. Once the new Caltrans bridge is complete, a new force main will be hung from the new Caltrans bridge and the existing and temporary facilities will be removed and replaced. Responsible for coordination and outreach with Caltrans, reimbursement agreement negotiations, engineering and construction management.

Rehabilitation of the City of Morro Bay Lift Stations #2 & #3, Morro Bay, CA. Project Manager. Owner's Project Manager for the design, rightof-way negotiations, permit acquisition, and construction to replace two vintage wet well/drywell lift stations with wet well only facilities. Extensive dewatering and NPDES permitting was required to protect estuary and riparian habitats. Authored front-end documents to serve as a new standard for the City of Morro Bay.

Well Condition Assessment, City of Pismo Beach, CA. Technical Advisor. Performing an evaluation of the City's two drinking water production wells, Well #5 and Well #23. The project includes an evaluation of specific capacity, well performance, plant efficiency, energy intensity trends, energy savings potential, condition of motor, pump, and electrical system, and improvement costs. WSC is coordinating with PG&E to obtain baseline data and subsidized pump testing. Results will be incorporated into a prioritized well capital improvement plan.

Five Cities Lift Station Replacement, City of Pismo Beach, CA. Technical

Advisor. Preparing design plans and specifications for the upgrade to the City's Five Cities Lift Station and forcemain. Project includes lift station alternatives analysis, pump selection, design of new submersible duplex lift station with a design flow of 625 gpm, and design of new 2,200-LF forcemain. Coordinating with PG&E to obtain energy efficiency incentives. Managing geotechnical, environmental, and surveying work.

California American Water, Design of 300 Linear Feet of 8-inch mainline in Borchard Rd, City of Thousand Oaks, CA. QA/QC. Design of 300 linear feet of 8-inch mainline in Borchard Rd. The new pipeline will connect an existing turnout connection with Calleguas Municipal Water District to CAW's system. Project includes the preparation of design drawings and specifications and construction support services.

California American Water, Los Robles Tank #1 Replacement, City of Thousand Oaks, CA. *Technical Advisor*. Project includes the replacement of a 140,000 gallon bolted steel tank with a 400,000 gallon welded steel reservoir. WSC is managing the planning, permitting, and design and preparing the grading plans, demolition plan, and site piping plans. Tasks include scheduling and budget management, technical oversight over design, permitting coordination, overview of design documents, and contract administration.

Water Treatment Plant (\$80M) and Intake (\$31M), City of Sacramento, CA. Project Engineer. The Sacramento River Intake and Water Treatment plant was upgraded to increase the plant capacity from 100 to 160 million gallons. Worked as a design engineer on components of both the new Intake and Treatment Plant.

Coleman Drive Realignment and Harborwalk, City of Morro Bay, CA. *Owner's Project Manager.* Worked in conjunction with the California State Coastal Conservancy and other agencies to remove and replace an existing road to create a tourist-engaging bicycle and pedestrian path along scenic Morro Bay's harbor frontage. This project included restoration of several acres of coastal dune habitat, and coordination and permitting with multiple federal, state, and local resource agencies.

Eagle Ridge Reservoir and Pumping Station, South County Regional Wastewater Authority, Gilroy, CA. Structural Engineer. Provided structural engineering and construction support services for the SCRWA Reclaimed Water Tank and Pumping Station. This project included the design of a 1.5 million gallon concrete reclaimed water tank. The site was on an old land slide and the scope of work included the design of a tie-back retaining wall and a pumping station. Designed the cigar-shaped reservoir and a tie-back retaining wall.

PROFESSIONAL ENDEAVORS

Water Systems Consulting, Inc. 2012 to Present
City of Morro Bay 2007 to 2012
Montgomery Watson Harza (MWH) 2000 to 2007
Crossroads Engineering 1998 to 1999
JMH WEISS 1997

Kendall Stahl PE, MS

PROFESSIONAL EXPERIENCE

Ms. Stahl is a Professional Civil Engineer with environmental engineering specializing in water and wastewater treatment design. She has experience in hydraulic analysis, pump station design and analysis, wastewater and wastewater treatment and water master planning. Her graduate studies focused on water security analysis, water demand management optimization, with an emphasis on characterizing the drivers of household water demand.

REPRESENTATIVE PROJECTS

Alternatives Analysis for Water Reclamation Facility Improvements and Upgrades, City of Atascadero, CA. Staff Engineer. Assisted with development of an alternatives analysis for the City of Atascadero's WRF to determine what the City needed to do to keep the treatment facility in compliance with regulations. Assisted the City in gaining a better understanding of the effluent limits that will apply to the WRF. The alternatives analysis established effluent limit targets, updated WRF flows and loads, and created two alternatives for further economic and non-economic evaluations.

On-Call Groundwater Modeling and Well Equipping, City of San Luis Obispo, CA. Staff

Engineer. Assisted with program management services for a groundwater modeling and well equipping project. Aided development of a preliminary design to equip the existing well on the Water Resource Recovery Facility site near Highway 101 and evaluated treatment alternatives and beneficial uses for the well. Provided as-needed support the City in funding opportunities for the project.

2020 Urban Water Management Plan, San Luis Obispo County Flood Control and Water Conservation District, CA. Contributing Author.

Developed the Zone 3 2020 UWMP which included a Demand Management Measures Technical Memorandum. In addition to developing the 2020 UWMP, Dan has assisted the Zone 3 stakeholders in developing a plan to limit downstream releases and municipal diversions from Lopez Reservoir during periods of low reservoir storage (i.e. less than 20,000 AF) to preserve water within the reservoir, above the minimum pool level, for a minimum of 3 to 4 years. Dan developed a model for Lopez Reservoir to evaluate possible drought scenarios and their potential impact on reservoir storage.

Central Coast Blue, City of Pismo Beach, **CA.** Engineering Support. Providing Program Management, Preliminary Design, Funding, and Environmental Document Support services for the Indirect Potable Reuse project that will recover secondary effluent from the City of Pismo Beach and the South San Luis Obispo County Sanitation District's wastewater treatment plants, a resource currently discharged to the Pacific Ocean. The advanced treatment facility will use microfiltration or ultrafiltration, reverse osmosis, and ultraviolet radiation and advanced oxidation process before being injected into the Santa Maria Groundwater Basin to supplement groundwater supplies and protect the basin from seawater intrusion. Construction is expected to begin in 2019.

2017 Engineering Report on Water Master Plan, Morro Rock Mutual Water Company,

Cayucos, CA. *Project Engineer.* Performing an update to the Mutual Water Company's Water Master Plan. Creating and calibrating an all-pipes, spatially allocated demand hydraulic model of the Mutual Water Company's water distribution system using Bentley's WaterGEMS software. Utilizing the hydraulic model to evaluate capacity limitations for current and future buildout scenarios and opportunities to optimize operations. Developing an updated CIP project list to prepare the City for budget planning.

PROFESSIONAL REGISTRATIONS

Professional Engineer, Civil, CA No. 91431

"I am passionate about creating practical yet innovative water solutions for our communities and helping to make them a reality."

Kendall Stahl

Kendall Stahl PE, MS continued...

Cayucos Sustainable Water Project, Cayucos Sanitary District, CA.

Treatment Process Design Engineer. Kendall was a process design lead and prepared plans and specifications for the recycled water system, on-site chemical feed and UV disinfection system. Design consisted of a recycled water dual pump station and on-site distribution system, 120,000-gallon recycled water tank, 1.2 MGD capacity effluent pump station and 8-inch force main, UV In-Vessel disinfection system, sodium hypochlorite chemical injection system, and an 8-inch fire protection distribution system.

Water Resource Recovery Facility Construction Management, Cayucos Sustainable Water Project, Cayucos Sanitary District, CA. Interim

Resident Project Representative and Inspector. Provided construction management as the client's interim onsite Resident Project Representative (RPR) for the construction of a new \$20.5 million 0.335 million gallon per day (MGD) water resource and recovery facility. The Project included green field construction of the new plant facilities including oversight of grading, pipeline placement, structural work for water bearing basins, vaults, and building pads. Provided onsite reporting and documentation of progress, provided document control through Bentley's ProjectWise, conducted regular progress meetings with client and contractor, tracked and resolved outstanding issues and conflicts, insured compliance with Contract Documents and permit requirements, and provided general inspection.

Wastewater Resource Recovery Facility Construction Administration and Construction Management, Cayucos Sustainable Water Project, Cayucos Sanitary District, CA. Field Design Engineer and SWPPP QSP Inspector.

Onsite field engineer for the construction of the 1.2 MGD Water Resource Recovery Facility (WRRF) as part of the Cayucos Sustainable Water Project. Provide field engineering services, document control, and assistance to the RPR during construction. Prepare design clarification memos, field orders and periodic construction observation, inspection and daily reports; review and respond to RFIs and submittals; perform QSP inspections, monitory and reporting with the Project's Stormwater Pollution Prevention Plan.

Alta Mesa Plant Site GAC Treatment Design, Golden State Water Company, Nipomo, CA. Project Design Engineer. Prepared design documents for wellhead treatment facilities to treat 1,2,3 TCP at the Alta Mesa Well for a combined production capacity of 600 gpm. Completed the GAC filter system preliminary engineering and prepared the final design and construction bid documents. Construction documents for the GAC filter system included project civil, mechanical and instrumentation sheets, specifications, and opinion of probable construction cost. Additional services included bid and construction phase support.

Northern Cities Staff Extension Services Fiscal Years 16-17, 17-18, 18-19, 19-20, and 20-21, Engineering Services. Cities of Arroyo Grande, Pismo Beach, Grover Beach, and Oceano, CA. Project Engineer. Provided as-needed engineering services for the City of Arroyo Grande, City of Grover Beach, City of Pismo Beach, and the Oceano Community Services District. Coordinated monthly meetings of the Northern Cities Management Area Technical Group. Interfaced with local and statewide regulatory agencies as an authorized agent of the Northern Cities. Tasks include preparing monthly agendas, updating the monthly groundwater production report and database, reviewing their Annual Report, developing a comparison summary of Annual Reports from the NCMA and NMMA, drafting a Case Management Conference Statement, preparing GIS exhibits and excel graphics for the NCMA Case Management Conference.

Northern Cities Management Agreement Update 2020, Cities of Arroyo Grande, Pismo Beach, Grover Beach, and Oceano, CA. Project Engineer. Provided professional services to assist the Northern Cities Management Area Technical Group (City of Arroyo Grande, City of Pismo Beach, City of Grover Beach, and Oceano Community Services District) with updating their 2002 Management Agreement. Assisted in the Northern Cities Technical Group in updating the agreement and develop an adaptive groundwater management strategy based on hydrogeologic conditions.

Los Osos Basin Management Committee, Los Osos, CA. Executive

Director Staff Support. Provides support to the executive Director for the Los Osos Groundwater Basin, Basin Management Committee (BMC), including assistance with BMC administration and facilitation, managing the work of BMC consultants, including completion of the Annual Monitoring Program and other water resource initiatives, and oversees the financial operation of the BMC. Functions as an extension of staff and is responsible for the timely completion of the Court-mandated annual reporting and represents the BMC to other entities, including DWR, RWQCB, and other agencies.

Perchloroethene (PCE) Plume Delineation and Groundwater Development Program, City of San Luis Obispo, CA. Project Engineer. Developed a Proposition 1 Groundwater Grant Application that successfully secured \$2 million to fund the development of a groundwater program that will allow the City to address contamination and improve the reliability of its drinking water supply.

North Pleasant Valley Desalter Facility, City of Camarillo, CA. Funding Support. Assisted with preparing a U.S Bureau of Reclamation (USBR) grant funding application through the WaterSMART Desalination Projects Under the WIIN Act for the design and construction of the City's North Pleasant Valley (NPV) Desalter Facility. Ms Stahl authored sections of the WIIN Act Desalination Program application for the NPV Desalter Facility which was successful in being awarded \$11,443,367 for the project.

Central Coast Blue, City of Pismo Beach, CA. *Funding Support.* Assisted with preparing a U.S. Bureau of Reclamation (USBR) grant funding application through the WaterSMART Title XVI Water Reclamation and Reuse Program Under the WIIN Act. Ms Stahl authored sections of the WIIN Act Water Reclamation and Reuse Program application for Central Coast Blue which was successful in being awarded \$796,094 in grant funding for the project.

Kendall Stahl PE, MS continued...

Water Resources Analysis Technical Memorandum, Avila Beach

Community Services District, CA. *Staff Engineer.* Prepare draft technical memorandum for the Avila Beach Community Services District. Evaluation and assembly of water resource reliability data, supply and demand characterization, and conditional dry and average supply and demand comparison information.

2015 Water Master Plan Update, City of Pismo Beach, CA. Staff

Engineer. Performing an update of the City of Pismo Beach 2004 Water Master Plan. Utilized the calibrated hydraulic model of the City's water distribution system using Bentley's WaterGEMS software to produce fire flow visuals for future buildout scenarios and opportunities to optimize operations. On-Call Services: Groundwater Modeling and Highway 101 Well Equipping Project, City of San Luis Obispo, CA. Project Design Engineer. Developed a preliminary design to equip the existing well on the Water Resource Recovery Facility site near Highway 101 and evaluated treatment alternatives and beneficial uses for the well. Provided as-needed support the City in funding opportunities for the Project.

Lift Station 5 Replacement Construction Management, Cayucos Sustainable Water Project, Cayucos Sanitary District, CA. Resident

Project Engineer and Inspector. Onsite representative for construction of Lift Station 5 Replacement Project as part of the Cayucos Sustainable Water Project. The project includes the replacement of the existing lift station with 4 VFD driven pumps with a 2,900 gpm peak flow capacity that provide influent to the new Water Resource Recovery Facility and construction of the effluent pipeline tie in from the WRRF to the existing infrastructure. Assisted with development of Bid Phase documentation and contractor procurement. Owner's representative for site inspections, quality control and contract management.

Lift Station 5 Replacement Design, Cayucos Sustainable Water Project, Cayucos Sanitary District, CA. Project Engineer/Engineer of Record. Prepared design plans and specifications, prepared construction documents, and facilitated two bidding periods for the lift station 5 replacement project. Age of the existing lift stations infrastructure and inadequate size of the existing pumps to accommodate the hydraulic changes required to pump to the District's new Water Resource Recovery Facility necessitated the replacement of the existing lift station. The Project includes the design of a 2,900-gpm peak flow capacity sewer lift station with four variable frequency driven pumps in a high flow/low flow configuration to accommodate the various flows of the District's sewer system. Performed value engineering on the Project after the first bid period and completed a redesign for the project in 2 months that reduced the construction cost of the Lift Station by \$1.2M.

Pipeline and Toro Creek Crossing Construction Management, Cayucos Sustainable Water Project, Cayucos Sanitary District, CA. Cayucos

Sanitary District, CA. Interim Resident Project Representative and Inspector. Onsite representative for construction of influent and effluent conveyance pipelines between Lift Station 5 and the Water Resource Recovery Facility. The project includes installation of approximately 4,000 feet of 16' and 14" HDPE pipe and includes Horizontal Directional Drilling of two separate 1,400 feet bores under Toro Creek. Assisted with development of Bid Phase documentation and contractor procurement. Owner's representative for site inspections, quality control and contract management.

Capacity and Connection Fee Study, City of San Luis Obispo, CA. Staff

Engineer. Performing a lift station life cycle energy cost and savings analysis the City on-call services to update their 2013 water and sewer impact fees development data. Evaluate the energy cost associated to the City lift stations and catchment cost savings from reduced sewer inflow and infiltration reduction. Developed unit hydrographs for 10 year 24-hour storm event to model program and infrastructure renewal strategy.

GSA Formation, City of Arroyo Grande, CA. *Staff Engineer.* Support the City in preparing a Groundwater Sustainability Agency (GSA) formation notification for the California Department of Water Resources for the intent to undertake sustainable groundwater management in accordance with the Sustainable Groundwater Management Act. The GSA formation notification included the preparation of boundary maps, stakeholder lists, and support coordination with adjacent local agencies forming a GSA.

PROFESSIONAL ENDEAVORS

Water Systems Consulting, Inc., December 2016 to present

TMK Consulting Engineers – Environmental Team, December 2015 – February 2016

State Water Quality Control Board, March 2013 - June 2015

STAFF REPORT

Credit/Debit Card Processing Fee

Background

When customers use a credit/debit card to pay their water bill, the District is charged a processing fee. Currently, the District does not pass this fee on to customers. As a result, the District pays about \$92,000 per year in credit/debit card processing fees. The District has the option to pass these processing fees on to the customer. The District expects an individual customer would pay about \$7 per month in credit card processing fees. Collectively, all customers who pay their bills via credit/debit card would pay a total of \$87,000 – \$95,000 per year.

Summary

The District could save approximately \$92,000 per year by passing credit/debit card fees on to customers.

Method

Charges to the District

Credit/debit card processing fees currently paid by the District are based on billing system data (Incode). By passing processing fees onto customers, <u>the District's</u> <u>credit/debit card processing fees would reduce from \$92,000 year on average to \$0 per year.</u>

Calendar Year	Credit card processing fee paid by District
2020	\$63,705
2021	\$94,023
2022	\$117,525 (expected)
Average Historical cost/ year	\$92,000
Proposed cost/ year	\$0
Difference	-\$92,000

Charges to Customers

There are several options for Customers to pay their bills; cash, check, direct payment (EFT), with a credit card in person, by phone, or online. Currently all payment methods are free to customers, with the exception of pay-by-phone (\$1.25 fee).

The pricing proposal the District received from our credit/debit card processing company assumes the average credit/debit card payment per customer is \$230. The District is charged 3.15% of each card transaction (with a minimum amount of \$2.00). Therefore, the District assumes each customer who pays their water bill with a card will pay \$7 per month in processing fees.

Monthly fee per transaction: \$7 = \$230 payment x 3.15% fee per transaction

The following examples show the range in annual fee (for all transactions) expected depending on the total number of transactions.

Annual fee (all transactions): \$87,000 = $\$7 \frac{transaction}{month} x 12,500 transactions$

Annual fee (all transactions): \$95,000 = $$7\frac{transaction}{month} \times 13,600 transactions$

Recommendation

This is an informational item that does not require a recommendation. The Board of Directors has the option to pass along a portion of processing fees, all processing fees or continue absorbing processing fees as a cost of doing business.

Memo

То:	Bob McDonald, General Manager
From:	Greg Stanford, Operation & Maintenance Manager
Date:	July 8, 2022
RE:	Fiscal 2022/2023 Auxiliary Services Contract – HQ Well Filtration Plant Coating

Please review the attached summary of the subject project. This recommendation is for the Fiscal 2022/2023 Auxiliary Services Contract to re-coat the Headquarters Well Filtration Plant. It is necessary for the District to outsource the re-coating of the Headquarters Well Filtration Plant including both filters, all inlet and outlet piping. The District does not have the necessary staff or equipment to perform the necessary processes to prep and apply the necessary coating to the facility. The District constructed this facility in 2003, the exterior surface coatings of the filters and piping are showing signs of deterioration. Several areas of the piping and the filter vessels, rust is beginning to show through the existing coating. Staff solicited bids from four service providers of which two responded and provided proposals.

The following are the contractors who submitted proposals:

- CD Lyons
- SUEZ / Utility Services Company

Each of the Contractors have been deemed qualified based on previous projects with District Staff. Please find Proposals from both contractors attached for review.

	CD Lyon	Suez
Labor	19,963.95	Not Broken Down
Equipment	2,590.10	Not Broken Down
Consumables	875.35	Not Broken Down
Paint Material	3,116.60	Not Broken Down
Trucking Service	2,310.00	Not Broken Down
Proposal Total Cost	28,856.00	64,824.00

*State law requires the District to only use Contractors that pay prevailing wage.

Based on the attached proposals submitted, I recommend award of this contract to CD Lyon, Inc. for this project.

C.D. Lyon, Inc.

General Engineering Contractor P.O. Box 1386, Ventura, CA 93002-1386 • (805) 653-0174 California State License # A974335

Alex Sapien Coating Superintendent C. D. Lyon, Inc. PO Box 1386 Ventura, CA 93002 6-2-2022

Attention: Greg Stanford / Lance

Re: Coating filters vessels, valves, and piping Proposal-REV 1

Thank you for the opportunity to provide a Lump Sum Proposal to coat Below and enclosed please find the Project Scope of Work (PSO), Clarifications and Exclusions, and the Lump Sum Cost Breakdown.

Section 1: PSO

The PSO is for C.D. Lyon Inc, for field work, C.D. Lyon will gather all equipment ready for project in the field at Carpinteria Valley Water District Plant, Cd Lyon will mechanical clean filter vessels, valves and piping, coating 2 coat system primer epoxy, and a polyurethane Ellwood tan

Section 2: Clarifications and Exclusions

The following is a list of Clarifications and Exclusions:

- This project is to be conducted on Straight Time; Overtime is excluded
- This project is bases on Prevailing wage rates
- Lump Sum Price is based on the specified coating system listed below; changing the system may impact the price
- This proposal is good for 30 days

C.D. Lyon, Inc.

General Engineering Contractor P.O. Box 1386, Ventura, CA 93002-1386 • (805) 653-0174 California State License # A614787

Section 3: Clarifications and Exclusions

The following is the proposed coating system:

- Blast: SSPC-SP 2, 3 hand tool cleaning and power tool cleaning
- **Primer:** Carboline 890 epoxy
- Topcoat polyurethane Ellwood tan
- Color: tan

Section 4: Lump Sum Cost

The Lump Sum Cost for the Project is \$.28,856.00 the following is a cost breakdown per task

Labor,	19,963.95

Equipment air compressor, paint pots /hose, air lines, ladders, power tools, hand, tools ______2,590.10

Consumables	875.35
Paint material	3,116.60
Trucking service	2,310.00

Thank you for the opportunity to provide this proposal and we look forward to working with you on this Project.

If you have any questions please feel free to contact me (Cell: 805-391-4508).

Sincerely,

Alex Sapien Coating Superintendent

Memo

To:	Bob McDonald, General Manager
From:	Greg Stanford, Operation & Maintenance Manager
Date:	July 8, 2022
RE:	Fiscal 2022/2023 On-Call Construction

Please review the attached summary of the subject project. This recommendation is for the Fiscal 2022/2023 On-Call Construction. Throughout each fiscal year it is necessary for the District to outsource particular water distribution system repair and maintenance work; this circumstance can be the result of emergency work, skillsets, workload, or additional support staff. By entering into an on-call construction contract with qualified contractors the District will have gone through a competitive selection process and be able to maintain insurance requirements in the case of an emergency. In addition, on-call contracts can reduce response time and provide a higher level of service to our customers. A Request for Qualifications (RFQ) was developed with the following attributes emphasized:

- Licensure
- Longevity
- Certificate of Insurance
- Company's capabilities with specific examples similar to our requirements
- Proximity to the District
- Rate Sheet
- References

Qualifications were solicited on Tuesday June 14, 2022, from seven regional contractors with a proven track record of installing water infrastructure for the District. The qualifications were due on Monday June 27, 2022, at 3:00 pm with the intent of the District selecting three contractors to provide options for reactionary work. By maintaining three contractors for on-call services the District will have options should one contractor be unable to respond or there are multiple projects occurring at one time. Three contractors submitted qualifications for the subject project. The following are the contractors who submitted qualifications:

- BSN Construction
- Elite General Engineering Inc.
- Sam Hill & Sons, Inc.
- Shaw Contracting Inc.
- Tierra Contracting
- Torro Enterprises

Each of the Contractors have been deemed qualified based on submitted documents and proven track records with District Staff. Rates sheets were submitted as part of the qualifications package with the following a selection for comparison:

	BSN	ELITE	TIERRA	TORO	SAM HILL	SHAW
FOREMAN	\$105.00	\$81.00	\$120.30	\$120.00	Did Not Bid	Did Not Bid
OPERATOR	\$130.00	\$80.00	\$103.45	\$114.00		
PIPE FITTER	\$105.00	\$78.00	\$99.24	\$89.00	-	
DRIVER	\$105.00	\$78.00	\$99.24	\$93.00		
LABORER	\$105.00	\$74.00	\$98.39	\$89.00		
EXCAVATOR	\$55.00	\$93.75	\$130.00	\$240.00		
BACKHOE	\$55.00	\$45.00	\$83.00	\$172.00		
DUMP TRUCK	\$55.00	\$45.00	\$60.00	\$125.00	-	
ASPHALT ROLLER	\$40.00	\$56.25	\$90.00	\$150.00		
Total	\$755.00	\$631.00	\$883.62	\$1,192.00	0	

*State law requires the District to only use Contractors that pay prevailing wage.

Therefore, I recommend that the top three contractors be awarded a contract for On-Call Services with Elite General Engineering as the primary contractor, BSN second and Tierra as the third contractor.

June 27th, 2022

Greg Stanford

Operation & Maintenance Manager Carpinteria Valley Water District 1301 Santa Ynez Avenue Carpinteria, CA 93013

RE: On-Call Construction Services June 2022 – Request for Proposals (RFP)

Dear Greg,

Thank you for allowing Tierra Contracting the opportunity to provide a proposal for the On-Call Construction Services June 2022 project. We are always excited when a local project comes along that allows us to showcase the exceptional qualities of our company.

Tierra Contracting, Inc is a union, certifiable small business based in Santa Barbara, CA. Tierra's focus is the public works / prevailing wage market. Tierra's annual volume is between \$15M and \$20M. Tierra was founded in 1978 and incorporated in 1981. Being in business for over 44 years means we have a long history of satisfied customers. The relationships we have built run deep with all of the local water and sewer districts.

Approximately 98-99% of the work performed on this project will be constructed by Tierra Contracting's own forces. The only anticipated subcontractors would be for sawcutting or landscaping. This allows us to maintain total control over the quality of the workmanship and provide exceptional attention to detail when following Carpinteria Water District's Standards.

Thank you again for the opportunity to provide a proposal for the On-Call Construction Services Project. Tierra Contracting has the manpower and a fleet of equipment and trucks ready to respond to any on-call repair situation.

Sincerely,

Blair Douglas President Tierra Contracting

Qualifications and Experience:

Tierra Contracting has been successfully working in the public works arena for 44 years. Our territory includes Santa Barbara, Carpinteria, Ventura, and as far north as Santa Maria. Tierra has approximately 45 employees, many of whom have been with Tierra for over 20 years. Tierra operates out of our singular office / yard located in Santa Barbara. This close proximity to Carpinteria Water Districts facilities will make responding to on-call emergencies / projects quick and efficient.

Tierra is very accustomed to On-Call type projects. Tierra currently responds to all oncall sewer issues from the City of Santa Barbara. Tierra also responds and supports Goleta Water District with any on-call / emergency related repairs to their water infrastructure system. Our staff and equipment is local and able to respond immediately to any issue that may arise day or night.

Overview of Tierra Contracting's Capabilities:

Underground Utilities - (Storm Drain, Water, Sewer, Gas, Dry Utilities)
Concrete Structures / Driveways / Sidewalks
Equipment - (Excavators, Wheel Loaders, Backhoes, Dozers, Water Trucks)
Trucking - (Lowbed, End Dump, Transfers, Ten Wheelers, Bobtails)
Debris Basin Excavation / Cleaning
Offhaul of Material (Dirt, Mud, Sand, Rock, Brush)
Installation of Storm Water Prevention BMP's
Bypass Systems - Installation and Monitoring
Rip Rap Slope Protection
Retaining Walls / Rock Revetment
Dewatering
AC Paving
24Hr Emergency Response

Tierra Safety Record:

Tierra Contracting has an excellent safety record. Many of our safety programs have been developed internally by Tierra to create a culture of safety where each employee is responsible for the safety of another. Tierra Contracting has not had any OSHA complaints or violations since our beginning in 1978.

Through the years, Tierra Contracting has created not just a safety program, but a "<u>culture</u>" of safety. Our culture of safety is instilled in our employees through quarterly safety breakfasts, weekly tailgate meetings, daily safety discussions, drug and alcohol screening, and random safety checks. Even our tee-shirt logo states "Safety First, Everyone Wins" which we truly believe.

One of the most telling indicators as to whether a company makes safety a priority is the <u>Experience Modification Rate (EMR)</u>. It is through Tierra's culture of safety that we can have an incredibly low Experience Modification Rate. This rate is published by the insurance companies and is the leading indicator of the amount of annual claims a company has. In other words, it is based on a company's safety record. Most companies have EMR numbers <u>greater than one</u>. The higher the number the worse safety record the company has. It is extremely rare to have an EMR less than one like Tierra's. Below is our 3 year average Experience Modification Rate which we are very proud of.

Policy Year	Experience Modification Rate
2019-2020	0.79
2020-2021	0.84
2021-2022	0.70
3-Year Avg	0.78

Year

Department of Industrial Relations Division of Occupational Safety & Health

All establishments covered by CCRTitle 8 Section 14300 must complete this Annual Summary, even if no work-related injuries or illnesses occurred during the year. Remember to review the Log to verify that the entries are complete and accurate before completing this summary.

Using the Log, count the individual entries you made for each category. Then write the totals below, making sure you've added the entries from every page of the Log. If you had no cases, write "0."

Employees, former employees, and their representatives have the right to review the Cal/OSHA Form 300 in its entirety. They also have limited access to the Cal/OSHA Form 301 or its equivalent. See CCR Title 8 Section 14300.35, in Cal/OSHA's recordkeeping rule, for further details on the access provisions for these forms.

Additional Information

Letters of Recommendations: Please see attached letters of recommendations.

Associations: Tierra Contracting is an active member of the Santa Barbara Contractor's Association and the Associated General Contractors Association. Blair Douglas and Bill Parker both serve on the Tri-Counties AGC Board as Directors.

Stantec Consulting Services Inc. 200 East Carrillo Street, Suite 101 Santa Barbara CA 93101-2137

December 16, 2021

Reference: Letter of Recommendation for Tierra Contracting, Inc.

To Whom It May Concern:

Stantec Consulting has had the great fortune of working with Tierra Contracting, Inc (Tierra) on many projects over the past three decades. Blair Douglas and his team consistently provide an excellent work product along with the highest level of professionalism, honesty, and integrity. Utilizing Tierra as a construction member of the team has allowed Stantec to collaborate with Tierra to solve design and construction challenges that arise on our projects.

From large campus wide utility infrastructure upgrade projects at UCSB, to sewer projects serving private residents in Montecito, Stantec is always excited to work together with Tierra on construction projects. It is with confidence that I recommend Tierra for any utility related project. Please don't hesitate to contact me if I can provide additional information about this excellent company.

Thank you,

Cami Poyton

Carrie Poytress, P.E. Senior Technical Leader Phone: (805) 308-9158 carrie.poytress@stantec.com

Subject: Letter of Recommendation – Tierra Contracting Inc.

To whom it may concern,

The Montecito Water District is an independent Special District local agency with a strong presence in Montecito and Summerland since 1921. The mission of Montecito Water District is to provide an adequate and reliable supply of high-quality water to the residents of Montecito and Summerland, at the most reasonable cost. The District has a surprisingly complex system of sources, pump stations, piping network, pressure zones, and treatment plants.

For several decades, the Montecito Water District has relied on Tierra Contracting as a trustworthy and reliable local contractor. Tierra assists the District with complex water main replacement projects including small and large diameter ductile iron pipe installation, galvanized and copper service line installation and repair, water meter and valve installation and repair, and pressure regulator repair and installation. Tierra is our go-to contractor during unplanned emergencies when repairs exceed the capabilities of our own staff. The employees at Tierra, from top to bottom, are professional, well trained, hardworking, and respectful individuals.

More recently, Tierra spent several weeks dedicated to assisting our agency's efforts to respond to the January 9, 2018 debris flow. Tierra played a critical role in helping our agency repair the water system to restore water service to the community in just 2 weeks following the event.

With this letter, I would like to strongly recommend Tierra for any similar work in our community and in the region. Please contact me with any questions.

Sincerely,

Adam Kanold, PE Assistant General Manager / Engineering Manager

ADDITIONAL REMARKS

THIS ADDITIONAL REMARKS FORM IS A SCHEDULE TO ACORD FORM,

FORM NUMBER: ACORD 25 FORM TITLE: Certificate of Liability Insurance

Description of Operations/Locations/Vehicles:

EXCESS LIABILITY POLICY NO. CUP-1T243807-22-NF

* Umbrella Liability Policy provides coverage in excess of the primary insurance policies listed below:

- General Liability Policy No. 54309932

- Automobile Liability Policy No. 54309931

- Employers Liability Policy No. 54309933

Cancellation:

* Should the policies be cancelled before the expiration date, Hub International Insurance Services Inc. (Hub), independent of any rights which may be afforded within the policies to the certificate holder named below, will provide to such certificate holder notice of such cancellation within thirty (30) days of the cancellation date, except in the event the cancellation is due to non-payment of premium, in which case Hub will provide to such certificate holder notice of such cancellation within ten (10) days of the cancellation date.

ADDITIONAL INSURED – OWNERS, LESSEES OR CONTRACTORS – SCHEDULED PERSON OR ORGANIZATION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

ered Operations
by written contract.
he

Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

- A. Section II Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by:
 - 1. Your acts or omissions; or
 - **2.** The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured(s) at the location(s) designated above.

However:

- 1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
- 2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

- 1. All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or
- 2. That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

C. With respect to the insurance afforded to these additional insureds, the following is added to Section III – Limits Of Insurance:

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or

2. Available under the applicable limits of insurance;

whichever is less.

This endorsement shall not increase the applicable limits of insurance.

ADDITIONAL INSURED – OWNERS, LESSEES OR CONTRACTORS – COMPLETED OPERATIONS

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART PRODUCTS/COMPLETED OPERATIONS LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s)	Location And Description Of Completed Operations
WHERE REQUIRED BY WRITTEN CONTRACT, BUT ONLY WHERE THE CONTRACT SPECIFIES COVERAGE FOR COMPLETED OPERATIONS.	ALL LOCATIONS WHERE REQUIRED BY WRITTEN CONTRACT.

Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

A. Section II – Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury" or "property damage" caused, in whole or in part, by "your work" at the location designated and described in the Schedule of this endorsement performed for that additional insured and included in the "products-completed operations hazard".

However:

- 1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
- 2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following is added to Section III – Limits Of Insurance:

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

- **1.** Required by the contract or agreement; or
- **2.** Available under the applicable limits of insurance;

whichever is less.

This endorsement shall not increase the applicable limits of insurance.

PRIMARY INSURANCE FOR SCHEDULED ADDITIONAL INSURED

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Additional Insured: WHERE REQUIRED BY WRITTEN CONTRACT. Location Of Covered Operations: ALL LOCATIONS

(If no entry appears above, information required to complete this endorsement will be shown in the Declarations as applicable to this endorsement.)

With respect only to the Additional Insured and at the Location Of Covered Operations shown in the Schedule, the following is added to **SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS**, Paragraph **4. Other Insurance** and supersedes any provision to the contrary:

Primary And Noncontributory Insurance

This insurance is primary to and will not seek contribution from any other insurance available to the Additional Insured with respect to the Location Of Covered Operations shown in the Schedule under this policy provided that:

- (1) The Additional Insured is a named insured under such other insurance; and
- (2) You have agreed in writing in a contract or agreement that this insurance would be primary and would not seek contribution from any other insurance available to the Additional Insured.

DESIGNATED CONSTRUCTION PROJECT(S) GENERAL AGGREGATE LIMIT

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Designated Construction Project(s):

ALL OF YOUR DESIGNATED CONSTRUCTION PROJECTS WHERE REQUIRED BY CONTRACT.

Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

- A. For all sums which the insured becomes legally obligated to pay as damages caused by "occurrences" under Section I Coverage A, and for all medical expenses caused by accidents under Section I Coverage C, which can be attributed only to ongoing operations at a single designated construction project shown in the Schedule above:
 - 1. A separate Designated Construction Project General Aggregate Limit applies to each designated construction project, and that limit is equal to the amount of the General Aggregate Limit shown in the Declarations.
 - The Designated Construction Project General Aggregate Limit is the most we will pay for the sum of all damages under Coverage A, except damages because of "bodily injury" or "property damage" included in the "productscompleted operations hazard", and for medical expenses under Coverage C regardless of the number of:
 - a. Insureds;
 - b. Claims made or "suits" brought; or
 - c. Persons or organizations making claims or bringing "suits".

- **3.** Any payments made under Coverage **A** for damages or under Coverage **C** for medical expenses shall reduce the Designated Construction Project General Aggregate Limit for that designated construction project. Such payments shall not reduce the General Aggregate Limit shown in the Declarations nor shall they reduce any other Designated Construction Project General Aggregate Limit for any other designated construction project shown in the Schedule above.
- 4. The limits shown in the Declarations for Each Occurrence, Damage To Premises Rented To You and Medical Expense continue to apply. However, instead of being subject to the General Aggregate Limit shown in the Declarations, such limits will be subject to the applicable Designated Construction Project General Aggregate Limit.

- B. For all sums which the insured becomes legally obligated to pay as damages caused by "occurrences" under Section I Coverage A, and for all medical expenses caused by accidents under Section I Coverage C, which cannot be attributed only to ongoing operations at a single designated construction project shown in the Schedule above:
 - Any payments made under Coverage A for damages or under Coverage C for medical expenses shall reduce the amount available under the General Aggregate Limit or the Products-completed Operations Aggregate Limit, whichever is applicable; and
 - 2. Such payments shall not reduce any Designated Construction Project General Aggregate Limit.
- **C.** When coverage for liability arising out of the "products-completed operations hazard" is provided, any payments for damages because of "bodily injury" or "property damage" included in the "products-completed operations hazard" will reduce the Products-completed Operations Aggregate Limit, and not reduce the General Aggregate Limit nor the Designated Construction Project General Aggregate Limit.
- **D.** If the applicable designated construction project has been abandoned, delayed, or abandoned and then restarted, or if the authorized contracting parties deviate from plans, blueprints, designs, specifications or timetables, the project will still be deemed to be the same construction project.
- **E.** The provisions of Section **III** Limits Of Insurance not otherwise modified by this endorsement shall continue to apply as stipulated.

COMMERCIAL AUTOMOBILE BROAD FORM ENDORSEMENT

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM

This endorsement modifies the Business Auto Coverage Form.

- 1. EXTENDED CANCELLATION CONDITION Paragraph A.2.b. – CANCELLATION - of the COMMON POLICY CONDITIONS form IL 00 17 is deleted and replaced with the following:
 - b. 60 days before the effective date of cancellation if we cancel for any other reason.

2. BROAD FORM INSURED

A. Subsidiaries and Newly Acquired or Formed Organizations As Insureds

The Named Insured shown in the Declarations is amended to include:

- Any legally incorporated subsidiary in which you own more than 50% of the voting stock on the effective date of the Coverage Form. However, the Named Insured does not include any subsidiary that is an "insured" under any other automobile policy or would be an "insured" under such a policy but for its termination or the exhaustion of its Limit of Insurance.
- 2. Any organization that is acquired or formed by you and over which you maintain majority ownership. However, the Named Insured does not include any newly formed or acquired organization:
 - (a) That is an "insured" under any other automobile policy;
 - (b) That has exhausted its Limit of Insurance under any other policy; or
 - (c) 180 days or more after its acquisition or formation by you, unless you have given us written notice of the acquisition or formation.

Coverage does not apply to "bodily injury" or "property damage" that results from an "accident" that occurred before you formed or acquired the organization.

B. Employees as Insureds

Paragraph A.1. – WHO IS AN INSURED – of SECTION II – LIABILITY COVERAGE is amended to add the following:

d. Any "employee" of yours while using a covered "auto" you don't own, hire or

borrow in your business or your personal affairs.

C. Lessors as Insureds

Paragraph A.1. – WHO IS AN INSURED – of SECTION II – LIABILITY COVERAGE is amended to add the following:

- e. The lessor of a covered ^aauto" while the "auto" is leased to you under a written agreement if:
 - The agreement requires you to provide direct primary insurance for the lessor; and

(2) The "auto" is leased without a driver. Such leased "auto" will be considered a covered "auto" you own and not a covered "auto" you hire.

However, the lessor is an "insured" only for "bodily injury" or "property damage" resulting from the acts or omissions by: 1. You;

- You;
 Any of your "employees" or agents;
- or
- 3. Any person, except the lessor or any "employee" or agent of the lessor, operating an "auto" with the permission of any of 1. and/or 2. above.
- D. Persons And Organizations As Insureds Under A Written Insured Contract Paragraph A.1 – WHO IS AN INSURED – of SECTION II – LIABILITY COVERAGE is amended to add the following:
 - f. Any person or organization with respect to the operation, maintenance or use of a covered "auto", provided that you and such person or organization have agreed under an express provision in a written "insured contract", written agreement or a written permit issued to you by a governmental or public authority to add such person or organization to this policy as an "insured".

However, such person or organization is an "insured" only:

Form: 16-02-0292 (Rev. 11-16)

Page 1 of 3

"Includes copyrighted material of Insurance Services Office, Inc. with its permission"

- (1) with respect to the operation, maintenance or use of a covered "auto"; and
- (2) for "bodily injury" or "property damage" caused by an "accident" which takes place after:
 - (a) You executed the "insured contract" or written agreement; or
 - (b) The permit has been issued to
 - you.
- FELLOW EMPLOYEE COVERAGE EXCLUSION B.5. - FELLOW EMPLOYEE – of SECTION II – LIABILITY COVERAGE does not apply.
- PHYSICAL DAMAGE ADDITIONAL TEMPORARY TRANSPORTATION EXPENSE COVERAGE Paragraph A.4.a. – TRANSPORTATION EXPENSES – of SECTION III – PHYSICAL DAMAGE COVERAGE is amended to provide a limit of \$50 per day for temporary transportation expense, subject to a maximum limit of \$1,000.
- AUTO LOAN/LEASE GAP COVERAGE Paragraph A. 4. – COVERAGE EXTENSIONS - of SECTION III – PHYSICAL DAMAGE COVERAGE is amended to add the following:

c. Unpaid Loan or Lease Amounts

In the event of a total "loss" to a covered "auto", we will pay any unpaid amount due on the loan or lease for a covered "auto" minus:

- 1. The amount paid under the Physical Damage Coverage Section of the policy; and
- 2. Any:
 - a. Overdue loan/lease payments at the time of the "loss";
 - Financial penalties imposed under a lease for excessive use, abnormal wear and tear or high mileage;
 - c. Security deposits not returned by the lessor:
 - d. Costs for extended warranties, Credit Life Insurance, Health, Accident or Disability Insurance purchased with the loan or lease; and
 - e. Carry-over balances from previous loans or leases.

We will pay for any unpaid amount due on the loan or lease if caused by:

- Other than Collision Coverage only if the Declarations indicate that Comprehensive Coverage is provided for any covered "auto";
- Specified Causes of Loss Coverage only if the Declarations indicate that Specified Causes of Loss Coverage is provided for any covered "auto"; or
- Collision Coverage only if the Declarations indicate that Collision Coverage is provided for any covered "auto.
- RENTAL AGENCY EXPENSE Paragraph A. 4. – COVERAGE EXTENSIONS – of SECTION III – PHYSICAL DAMAGE COVERAGE is amended to add the following:

d. Rental Expense

We will pay the following expenses that you or any of your "employees" are legally obligated to pay because of a written contract or agreement entered into for use of a rental vehicle in the conduct of your business: MAXIMUM WE WILL PAY FOR ANY ONE

CONTRACT OR AGREEMENT:

- \$2,500 for loss of income incurred by the rental agency during the period of time that vehicle is out of use because of actual damage to, or "loss" of, that vehicle, including income lost due to absence of that vehicle for use as a replacement;
- \$2,500 for decrease in trade-in value of the rental vehicle because of actual damage to that vehicle arising out of a covered "loss"; and
- 3. \$2,500 for administrative expenses incurred by the rental agency, as stated in the contract or agreement.
- 4. \$7,500 maximum total amount for paragraphs 1., 2. and 3. combined.
- EXTRA EXPENSE BROADENED COVERAGE Paragraph A.4. – COVERAGE EXTENSIONS – of SECTION III – PHYSICAL DAMAGE COVERAGE is amended to add the following:
 - Recovery Expense
 We will pay for the expense of returning a stolen covered "auto" to you.

8. AIRBAG COVERAGE

Paragraph B.3.a. - EXCLUSIONS – of SECTION III – PHYSICAL DAMAGE COVERAGE does not apply to the accidental or unintended discharge of an airbag. Coverage is excess over any other collectible insurance or warranty specifically designed to provide this coverage.

9. AUDIO, VISUAL AND DATA ELECTRONIC EQUIPMENT - BROADENED COVERAGE Paragraph C.1.b. – LIMIT OF INSURANCE - of SECTION III - PHYSICAL DAMAGE is deleted and replaced with the following:

- \$2,000 is the most we will pay for "loss" in any one "accident" to all electronic equipment that reproduces, receives or transmits audio, visual or data signals which, at the time of "loss", is:
 - Permanently installed in or upon the covered "auto" in a housing, opening or other location that is not normally used by the "auto" manufacturer for the installation of such equipment;
 - Removable from a permanently installed housing unit as described in Paragraph 2.a. above or is an integral part of that equipment; or
 - (3) An integral part of such equipment.

10. GLASS REPAIR - WAIVER OF DEDUCTIBLE

Form: 16-02-0292 (Rev. 11-16)

Page 2 of 3

"Includes copyrighted material of Insurance Services Office, Inc. with its permission"

Under Paragraph D. - DEDUCTIBLE – of SECTION III – PHYSICAL DAMAGE COVERAGE the following is added:

No deductible applies to glass damage if the glass is repaired rather than replaced.

11. TWO OR MORE DEDUCTIBLES Paragraph D.- DEDUCTIBLE – of SECTION III – PHYSICAL DAMAGE COVERAGE is amended to add the following:

If this Coverage Form and any other Coverage Form or policy issued to you by us that is not an automobile policy or Coverage Form applies to the same "accident", the following applies:

- If the deductible under this Business Auto Coverage Form is the smaller (or smallest) deductible, it will be waived; or
- 2. If the deductible under this Business Auto Coverage Form is not the smaller (or smallest) deductible, it will be reduced by the amount of the smaller (or smallest) deductible.

12. AMENDED DUTIES IN THE EVENT OF ACCIDENT, CLAIM, SUIT OR LOSS

Paragraph A.2.a. - DUTIES IN THE EVENT OF AN ACCIDENT, CLAIM, SUIT OR LOSS of SECTION IV - BUSINESS AUTO CONDITIONS is deleted and replaced with the following:

- In the event of "accident", claim, "suit" or "loss", you must promptly notify us when the "accident" is known to:
 - (1) You or your authorized representative, if you are an individual;
 - (2) A partner, or any authorized representative, if you are a partnership;
 - (3) A member, if you are a limited liability company; or
 - (4) An executive officer, insurance manager, or authorized representative, if you are an organization other than a partnership or limited liability company.

Knowledge of an "accident", claim, "suit" or "loss" by other persons does not imply that the persons listed above have such knowledge. Notice to us should include:

- (1) How, when and where the "accident" or "loss" occurred;
- (2) The "insured's" name and address; and
- (3) To the extent possible, the names and addresses of any injured persons or witnesses.

13.) WAIVER OF SUBROGATION

Paragraph A.5. - TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US of SECTION IV – BUSINESS AUTO CONDITIONS is deleted and replaced with the following:

 We will waive the right of recovery we would otherwise have against another person or organization for "loss" to which this insurance applies, provided the "insured" has waived their rights of recovery against such person or organization under a contract or agreement that is entered into before such "loss".

To the extent that the "insured's" rights to recover damages for all or part of any payment made under this insurance has not been waived, those rights are transferred to us. That person or organization must do everything necessary to secure our rights and must do nothing after "accident" or "loss" to impair them. At our request, the insured will bring suit or transfer those rights to us and help us enforce them.

14. UNINTENTIONAL FAILURE TO DISCLOSE HAZARDS

Paragraph B.2. – CONCEALMENT, MISREPRESENTATION or FRAUD of SECTION IV – BUSINESS AUTO CONDITIONS - is deleted and replaced with the following: If you unintentionally fail to disclose any hazards existing at the inception date of your policy, we will not void coverage under this Coverage Form because of such failure.

15. AUTOS RENTED BY EMPLOYEES

Paragraph B.5. - OTHER INSURANCE of SECTION IV – BUSINESS AUTO CONDITIONS - is amended to add the following:

e. Any "auto" hired or rented by your "employee" on your behalf and at your direction will be considered an "auto" you hire. If an "employee's" personal insurance also applies on an excess basis to a covered "auto" hired or rented by your "employee" on your behalf and at your direction, this insurance will be primary to the "employee's" personal insurance.

16. HIRED AUTO – COVERAGE TERRITORY Paragraph B.7.b.(5). - POLICY PERIOD, COVERAGE TERRITORY of SECTION IV – BUSINESS AUTO CONDITIONS is deleted and replaced with the following:

- (5) A covered "auto" of the private passenger type is leased, hired, rented or borrowed without a driver for a period of 45 days or less; and
- 17. RESULTANT MENTAL ANGUISH COVERAGE Paragraph C. of - SECTION V – DEFINITIONS is deleted and replaced by the following: "Bodily injury" means bodily injury, sickness or disease sustained by any person, including mental anguish or death as a result of the "bodily injury" sustained by that person.

Form: 16-02-0292 (Rev. 11-16)

PRIMARY AND NON-CONTRIBUTORY LIABILITY INSURANCE

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM

With respect to coverage provided by this endorsement, the provisions of the Coverage Form apply unless modified by the endorsement.

This endorsement changes the policy effective on the inception date of the policy unless another date is indicated below.

Named Insured: Tierra Contracting, Inc.

Endorsement Effective Date: 04/01/2022

SCHEDULE

Name(s) Of Person(s) Or Organization(s):

Where Required By Written Contract.

Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

The following is added to Item 5. – "**Other Insurance**" of Item B. – "**General Conditions**" under Section IV – "**Business Auto Conditions**":

e. Regardless of the provisions of Paragraph 5.a. through d. above, for any liability arising out of the ownership, maintenance, use, rental, lease, loan, hire or borrowing by an "insured" of a covered "auto" for which an "insured" is contractually obligated to provide primary insurance coverage to a client, this Coverage Form will be primary and non-contributory with respect to the Persons or Organizations in the schedule, regardless of the availability or existence of other collectible insurance under any other Coverage Form or policy that applies on a primary basis.

UMBRELLA

- **a.** Seeking damages to which this insurance does not apply; or
- **b.** If any other insurer has a duty to defend.
- **3.** When we have the duty to defend, we may, at our discretion, investigate and settle any claim or "suit". In all other cases, we may, at our discretion, participate in the investigation, defense and settlement of any claim or "suit" for damages to which this insurance may apply. If we exercise such right to participate, all expenses we incur in doing so will not reduce the applicable limits of insurance.
- 4. Our duty to defend ends when we have used up the applicable limit of insurance in the payment of judgments or settlements, or defense expenses if such expenses are within the limits of insurance of this policy.
- We will pay, with respect to a claim we investigate or settle, or "suit" against an insured we defend:
 - a. All expenses we incur.
 - **b.** The cost of:
 - Bail bonds required because of accidents or traffic law violations arising out of the use of any vehicle to which this insurance applies; or
 - (2) Appeal bonds and bonds to release attachments;

but only for bond amounts within the applicable limit of insurance. We do not have to furnish these bonds.

- C. All reasonable expenses incurred by the insured at our request to assist us in the investigation or defense of such claim or "suit", including actual loss of earnings up to \$1,000 a day because of time off from work.
- **d.** All court costs taxed against the insured in the "suit". However, these payments do not include attorneys' fees or attorneys' expenses taxed against the insured.
- e. Prejudgment interest awarded against the insured on that part of the judgment we pay. If we make an offer to pay the applicable limit of insurance, we will not pay any prejudgment interest based on that period of time after the offer.
- f. All interest that accrues on the full amount of any judgment after entry of the judgment and before

we have paid, offered to pay or deposited in court the part of the judgment that is within the applicable limit of insurance. If we do not pay part of the judgment for any reason other than it is more than the applicable limit of insurance, we will not pay any interest that accrues on that portion of the judgment.

With respect to a claim we investigate or settle, or "suit" against an insured we defend under COVERAGE A - EXCESS FOLLOW-FORM LIABILITY, these payments will not reduce the applicable limits of insurance, but only if the applicable "underlying insurance" provides for such payments in addition to its limits of insurance. With respect to a claim we investigate or settle, or "suit" against an insured we defend under COVERAGE - UMBRELLA LIABILITY, these B payments will not reduce the applicable limits of insurance.

SECTION II - WHO IS AN INSURED

A. COVERAGE A – EXCESS FOLLOW-FORM LIABILITY

With respect to Coverage **A**, the following persons and organizations qualify as insureds:

- 1. The Named Insured shown in the Declarations; and
- 2. Any other person or organization qualifying as an insured in the "underlying insurance". If you have agreed to provide insurance for that person or organization in a written contract or agreement:
 - a. The limits of insurance afforded to such person or organization will be:
 - (1) The amount by which the minimum limits of insurance you agreed to provide such person or organization in that written contract or agreement exceed the total limits of insurance of all applicable "underlying insurance"; or
 - (2) The limits of insurance of this policy;

whichever is less; and

 b. Coverage under this policy does not apply to such person or organization if the minimum limits of insurance you agreed to provide such person or organization in that written contract or agreement are wholly within the total limits of insurance of all available applicable "underlying insurance".

Ben Nakaba / President

QUALIFICATIONS AND EXPERIENCE:

Qualifications and Experience –

• BSN Construction Inc was established in 2004 as a General Engineering Contractor, specializing in all aspects of Underground Utilities, Asphalt, Concrete and Earthworks. Water works has always been a main focus of ours, as we have been an on-call contractor for many agencies over the years. Our Field staff ranges from 7 employees and up, depending on the work load, our office staff includes three employees, Carolyn Kirby- Office Manager, Staci Nakaba- Assistant, and Ben Nakaba- President who oversees all operations of the business day to day operations. Our location of our yard is located on the West side of Ventura. Sub contactors to be utilized would be for major traffic control, Saw cutting, grinding, striping, Chlorination. BSN Construction feels we are a good fit to work with Carpinteria Valley Water as we have extensive experience in water works and being an on Call Contractor. We have also completed numerous projects relating to this kind of work for both the public and private sector. We have the necessary Equipment and personal, we have great relationships with all of our long time vendors.

Overview and capabilities-

BSN Construction Inc. is able to handle most water repairs, from mains, down to a small service repair and everything in between. (Mains, Valves, blow offs, air vacs, hydrants backflows, fittings, hot taps, services, chlorination, Repairs, replacements, installs,) We are a turnkey Contractor and complete the job from calling in the dig alert ticket to the final cleanup of the damaged areas. (Call in dig alerts, demo AC/ Concrete, excavate, import/export, repair AC/Concrete, coordinate with all agencies and public involved.) We have all the equipment and needed and manpower for this type of work including our own Steel plates.

• Provide a description of three projects similar to this scope of work that have been completed for public agencies, water districts, federal government, non-profit organizations, or private companies. Note the relevance of each project to the objectives of this project. Brief descriptions of additional projects that demonstrate the company's track record to perform the required services may be included in tabular format.

See attached

 Include the name of the organization for the projects stated above, and the address, name, email, and telephone number for the owner's point of contact.

See attached

• Provide a narrative explaining ability to respond to on-call requests, supplement District staff, and location of equipment.

Ben Nakaba the President of BSN Construction Inc. always has his cell phone on for the on call contracts, we always call back if the phone is not answered right away. We will mobilize in a timely manner when needed if possible, not all the time can we respond in the time needed. Which is why most agencies have a few contractors on board.

• List certifications and training (i.e. confined space, traffic control, safety)

We are certified in Competent persons, confined space and always keep our OSHA Excavation permit up to date.

• Provide a safety record and document any instances in the past five years that have led to missed time or insurance claims

No accidents or incidents.

EMR Ratings: 2021-0.87, 2020-0.87, 2019-0.89.

• Yard location and proximity to the District

Yard Location: Westside of Ventura les than 20 mile from Carpinteria

• Provide a list and rate sheet of equipment (i.e. heavy equipment, traffic control, confined space entry) See Attached:

Optional – provide a maximum of three additional references

See attached.

LIC# 806551

Qualifications & Experience:

Established in 1994, Toro Enterprises Inc. has served the Central and Southern regions of California in both the construction and civil based industries for over 28 years. With almost three decades of knowledge and experience in road development and construction, Toro concentrates on providing safe, high-quality, environmentally responsible infrastructure solutions while maintaining a strong focus on serving our customers. With each project we have effectively grown into important sectors of both city and regional planning, such as; street improvements, underground utilities, structural and architectural concrete and earth moving. In an industry where specialization is key, Toro Enterprises Inc. has established themselves as the premier general engineering contractor encompassing all aspects of the industry. Serving commercial/industrial, residential, bond exoneration, and public works projects.

Our services include:

- Street improvements
- Site concrete and AC paving
- Structural and architectural concrete
- Underground utilities (water, sewer and storm drain)

Traffic Control

Earth moving

Our Professional staff consists of estimators, project engineers, project managers, field supervisors, administrative/office personnel, and field: laborers, operators, carpenters, & cement masons.

Projects Reference List:

Project Name: On-Call Mechanical Facility Repair, Maintenance, Replacement and Construction Services Project

Scope of Work: Work included repair, maintenance and replacement of exposed and underground water, wastewater, recycled water, storm water pipes, tanks, vessels, valves, meters, manholes, sensors and street repairs related to repair or maintenance.

Owner: City of Oxnard

Address: 300 W 3rd Street, Oxnard, CA 93030

Contact: Renee Hatcher, Construction Project Coordinator Phone Number: (805) 200-5289

Email: renee.hatcher@oxnard.org

Project Name: On-Call Construction Services for As-Needed Storm Drain Repair

Scope of Work: Work included but not limited to; Storm drain pipe installation, slip-lining, rehabilitation and/or repair, Storm drain manhole repair and/or rehabilitation (i.e., installing manholes, raising manholes, etc.), Installing and/or repairing concrete curb, gutter, sidewalk etc., Catch basin installation, refurbishment and repairs, Ditch maintenance including concrete, asphalt and natural bottomed, Asphalt repair/maintenance near work area, Concrete repair/maintenance near work area, Drainage grate installation, removal, fabrication and/or repair, Road shoulder grading and Lift station structure repairs including patching.

Owner: City of Ventura

Address: 501 Poli Street, Ventura, CA 93001

Contact: Chris Palmieri, Public Works Supervisor Phone Number: (805) 654-7800

Email: cpalmieri@cityofventura.org

Project Name: On-call/As-Needed Pipeline Repair and Paving/Concrete Services

Scope of Work: Work included but not limited to, perform appurtenance modification and relocation, valve replacement, adjustment of utility structures to grade, and other pipeline protection, repair, and construction work on an on-call, as-needed basis on Las Virgenes Municipal Water District (District) facilities in the cities of Westlake Village, Agoura Hills, Calabasas, Hidden Hills, Chatsworth and unincorporated areas of Los Angeles and Ventura Counties, California. Owner: Las Virgenes Municipal Water District Address: 4232 Las Virgines Road, Calabasas, CA 91302 Contact: Oliver Slosser Phone Number: (818) 251-2143 Email: oslosser@lvmwd.com

Provide a narrative explaining ability to respond to on-call requests, supplement District staff, and location of equipment:

Toro Enterprises, Inc. has over 270 employees. With this number, we can offer great flexibility in providing the necessary forces in short notice. Regardless of our current or future workload at any point, we will be able to be on a Carpinteria Valley Water District job site within an hour in most cases.

List certifications and training (i.e., confined space, traffic control, safety):

- Confined Space Training
- Competent person Training
- 8 Hour Water Pollution Control Manager Training
- Lead Awareness Training
- Portable Nuclear Gauges Training
- Nighttime Work Zone Lighting Training
- Traffic Control Training
- OSHA Training
- CPR Training
- Pipeline Awareness for Excavator Operations Training
- Respiratory Safety Training
- Sexual Harassment Training
- Excavation & Trenching Safety Training

• Provide a safety record and document any instances in the past five years that have led to missed time or insurance claims:

Please see attached OSHA Logs.

Yard location and proximity to The District:

Toro Enterprises Inc. has one office/yard located in Oxnard, California. 2101 East Ventura Blvd, Oxnard, CA 93036

• Provide a list and rate sheet of equipment (i.e., heavy equipment, traffic control, confined space entry):

Please see attached list and rate sheet of equipment.

To whom it may concern:

In our continuing effort to provide timely certificate delivery, Lockton Companies is transitioning to **paperless delivery** of Certificates of Insurance, thus this is your final hard-copy delivery.

To ensure electronic delivery for future renewals of this certificate, we need your email address. Please contact us via one of the methods below, referencing Certificate ID **18625104**

- Email: LACertseDelivery@lockton.com
- Phone: (213) 334- 4669

If you received this certificate through an internet link where the current certificate is viewable, we have your email and no further action is needed.

In the event your mailing address has changed, will change in the future, or you no longer require this certificate, please let us know using one of the methods above.

The above inbox and phone number is for automating electronic delivery of certificates only. Please do NOT send future certificate requests to this inbox or contact the phone number below with email updates.

Thank you for your cooperation and willingness in reducing our environmental footprint.

February 2009 - present

EAGLE ENGINEERING & DEVELOPMENT, INC. POMONA, CA

C.Q.C. Manager/Supt/SSHO Various Government Projects, Barstow Marine Corps Base, Camp Pendleton

Participate in the Post Award Kick-off, Partnering, Design Development and coordination Meetings and Production Meetings. Ensure that no construction begins before the DOR has signed and stamped the design for that segment of work, and design and construction submittals are approved as required in Attachment A and the QC Plan. Immediately stop any work that does not comply with contract plans and specifications, and direct the removal and replacement of any defective work. Prepare QC Reports. Hold biweekly QC meetings with DOR, Superintendent and Government technical team; participation shall be suitable for the phase of work. Ensure that safety inspections are performed. Attend weekly Toolbox Safety meetings. Maintain submittal log. Maintain updated as-built drawings on site. Maintain testing plan and log. Ensure that all testing is performed per contract. Maintain deficiency log on site, noting dates deficiency identified, and date corrected. Certify and sign statement on each invoice that all work to be paid under the invoice has been completed in accordance with contract requirements. Perform Punch-Out and Pre-final inspections, and participate in Final Inspections. Establish list of deficiencies; correct prior to the Final inspection. Ensure that all required keys, operation and maintenance manuals, warranty certificates, and the As-built drawings are submitted to the Contracting Officer. Review and certify all submittals. Currently Assigned to 29 Palms, Marine Corps Air Ground Combat Center (USACE).

EQUIPMENT MOVE CHARGES APPLY AT \$150.00 PER HOUR. 9 AXLE MOVES AT \$185.00 PER HOUR.

SAW TRUCK, TRAVEL TIME IF LESS THAN THE 4 HOUR MINIMUM WILL BE CHARGED \$104.00 PER HOUR

Operator rates are based upon a four hour minimum. Toro Enterprises, Inc. is an insured, bondable union contractor. All equipment rates are operated and maintained.

Prices in Toro Enterprises, Inc.'s bid for projects with high fuel and lubricant consumption (including but not limited to grading jobs) are based substantially on fuel and lubricant prices that were in effect on the date of Toro Enterprises, Inc.'s final bid (Base Price). Due to the extreme volatility in the fuel and lubricant market, project Owner and / or General Contractor concur that by entering into a Subcontract Agreement with Toro Enterprises, Inc. on this project, project Owner and / or General Contractor agrees to reimburse Toro Enterprises, Inc. for fuel and lubricant price escalations that occur during the life of this project.

In addition, there will be a 10% fuel surcharge added to the existing rates during this time of fuel uncertainty.

RATES GOOD THROUGH: 7/01/2022
